**South African journal of dairy technology**, 1984 *Political Identity and Social Change* Jamie Frueh, 2012-02-01 Political Identity and Social Change builds upon the constructivist theory of political identity to explore the social changes that accompanied the end of apartheid in South Africa To gain a better understanding of how structures of identity changed along with the rest of South Africa s

institutions Frueh analyzes three social and political conflicts the Soweto uprisings of 1976 the reformist constitutional debates of 1983 1984 and post apartheid crime Analyzing these conflicts demonstrates how identity labels function as structures of social discourse how social activity is organized through these structures and how both the labels and their power have changed during the course of South Africa s transition In this way the book contributes not only to the study of South African society but also provides lessons about the relationship between identity and social change **Dutch**

**Contributions to the Sixteenth International Congress of Slavists. Linguistics** ,2019-11-04 Every five years on the occasion of the International Congress of Slavists a volume appears that presents a comprehensive overview of current Slavic linguistic research in the Netherlands Like its predecessors the present collection covers a variety of topics Bulgarian and Polish aspectology Barentsen Genis Slavic historical linguistics Kortlandt Vermeer pragmatics of tense usage in Old Russian Dekker dialect description Houtzagers L2 acquisition Tribushinina Mak Russian foreigners speech imitation Peeters Arkema corpus based semantics Fortuin Davids and theoretical work on negation Keijsper Van Helden As can be seen from this list the majority of the contributions in this peer reviewed volume displays the data oriented tradition of Dutch Slavic linguistics but studies of a more theoretical nature are also represented *South African Journal of Wildlife Research* ,1993

*REsearch ABC* Laetus Lategan,2006-07-01 Delivering research outputs has become increasingly important for many students involved in working towards a research degree RE search ABC highlights contemporary practices and provides a framework for an up to date understanding of the research process and the key issues associated with it It integrates a number of imperative topics including the writing of a research protocol the applying of methodology in research projects the respective roles of the supervisor and student the writing of a scientific article and the presenting of research results The analysis draws upon both theory and real case studies **The Composition of Meaning** Alice G. B. ter Meulen,Werner Abraham,2004-01-01

In the modular design of generative theory the syntax semantics interface has accounted all along for meanings at the level of Logical Form The syntax pragmatics interface on the other hand is the result of what one may call the pragmatic turn in the linguistic theory where content is partitioned into given and new information In other words the structural division of the clause has been subjected to criteria of information or discourse structure Both interfaces require a structurally descriptive inventory whose specific shapes can be motivated on theory internal grounds only The present collection of original articles develops the concept of these interfaces further The papers in the first section focus on the syntax semantics interface those in the second section on the syntax pragmatics interface **Word Order Change in**

**Acquisition and Language Contact** Bettelou Los,Pieter de Haan,2017-12-14 The case studies in this volume offer new insights into word order change As is now becoming increasingly clear word order variation rarely attracts social values in the way that phonological variants do Instead speakers tend to attach discourse or information structural functions to any word order variation they encounter in their input either in the process of first language acquisition or in situations of

language or dialect contact In second language acquisition fine tuning information structural constraints appears to be the last hurdle that has to be overcome by advanced learners The papers in this volume focus on word order phenomena in the history of English as well as in related languages like Norwegian and Dutch based creoles and in Romance *ITNG 2024: 21st International Conference on Information Technology-New Generations* Shahram Latifi, 2024-07-08 This volume represents the 21st International Conference on Information Technology New Generations ITNG 2024 ITNG is an annual event focusing on state of the art technologies pertaining to digital information and communications The applications of advanced information technology to such domains as astronomy biology education geosciences security and health care are the among topics of relevance to ITNG Visionary ideas theoretical and experimental results as well as prototypes designs and tools that help the information readily flow to the user are of special interest Machine Learning Robotics High Performance Computing and Innovative Methods of Computing are examples of related topics The conference features keynote speakers a best student award poster award service award a technical open panel and workshops exhibits from industry government and academia This publication is unique as it captures modern trends in IT with a balance of theoretical and experimental work Most other work focus either on theoretical or experimental but not both Accordingly we do not know of any competitive literature **York Papers in Linguistics**, 1989 **Triggers** Anne Breitbarth, Henk van Riemsdijk, 2008-08-22 The concept of trigger is a core concept of Chomsky's Minimalist Program The idea that certain types of movement are triggered by some property of the target position is at least as old as the notion that the movement of noun phrases to the subject position is triggered by their need to receive nominative case In more recent versions of syntactic theory triggering mechanisms are thought to regulate all of movement Furthermore a quite narrow range of triggering mechanisms is permitted As is to be expected such a restrictive approach meets a variety of difficulties Specifically the question is whether all triggering elements required to cover displacement of all kinds in natural language can be independently motivated Further how can a trigger theory which crucially relies on the idea that all movement is obligatory deal with apparently optional movement processes Are features an adequate means to express the triggering function in all cases More radically are all movement phenomena really the result of the checking of trigger features And what about apparent triggering factors that are external to syntax such as prosody can they be captured in a rigid trigger theory In other words could certain aspects of triggered movement be due to interface conditions Such is the range of questions addressed by the fourteen contributions to this book They cover a considerable range of languages including Afrikaans Breton Bulgarian Dutch English French German Gungbe Hungarian Italian Japanese Kiswahili Romanian These papers present materials both empirical and theoretical that will not fail to have considerable impact on the further development of the concept of trigger in syntactic theory **Theory and description in African Linguistics** Emily Clem, Peter Jenks, Hannah Sande, 2019 The papers in this volume were presented at the 47th Annual Conference on African Linguistics at UC Berkeley in 2016 The papers offer new descriptions of

African languages and propose novel theoretical analyses of them. The contributions span topics in phonetics, phonology, syntax, semantics, and pragmatics and reflect the typological and genetic diversity of languages in Africa. Four papers in the volume examine Areal Features and Linguistic Reconstruction in Africa and were presented at a special workshop on this topic held alongside the general session of ACAL.
