What Should We Be Worried About:

The National Debt and Our Grandchildren: Should We Worry? Arthur Benavie, 2023-10-13 Throughout our history Americans have embraced the myth that our national debt is immoral and destructive This deeply rooted belief goes back to our Founding Fathers Jefferson excoriated debt as the greatest of dangers to be feared Andrew Jackson demonized debt as a national curse Current political leaders continue to endorse this negative view of our national debt Obama said that incurring debt was irresponsible and unpatriotic John McCain condemned it as generational theft In this book the prize winning economics professor Arthur Benavie demonstrates in clear and non technical language that belief in this myth has repeatedly blocked our federal government from creating jobs and investing in our children s future Benavie describes the many occasions including from the administrations of FDR to Obama where our leaders were faced with severe political retribution at the mere suggestion that their policies would increase the national debt Belief in this myth presents a continuing danger to the wellbeing of our children and grandchildren Benavie examines several ways to disempower it **Words for**

Social Problems Donileen R. Loseke, Joel Best, 2017 This collection of focused essays is directed at several levels of students of social problems It is accessible to the uninitiated who are not familiar with the constructionist literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives Some readings focus on the construction of problems by scientists and other professionals others examine the work of social activists mass media and social service personnel Among the topics included are studies of social inequalities and individual deviance a comparison of the images of social problems in the United States with those in other countries and an examination of the importance of politics and power in constructing public images of social problems

Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems Yet constructionists impact on the teaching of social problems has been far less dramatic Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives Just as the first social problems textbooks did almost a century ago textbooks continue to present a series of unrelated chapters each devoted to a particular social problem Social Problems is an effort at systematic analysis rather than random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke s Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide their own mix to the selection process Many of the contributions make multiple points and so reasonably could be used to illustrate other basic texts or classic studies in the field of social problems Donileen R Loseke is professor of sociology at the University of South Florida Joel Best is professor and chair Department of Sociology and Criminal Justice University of Delaware He has also served as an advisory editor for Aldine in the area of social problems
