"This is a fierce book. . . . Its basic premise—that we're in worse trouble than we understand, and that a little change around the edges won't help—is precisely the message that needs to get out."

—Bill McKibben

## **What We Leave Behind Derrick Jensen:**

**What We Leave Behind** Derrick Jensen, Aric McBay, 2011-01-04 *What We Leave Behind* is a piercing impassioned guide to living a truly responsible life on earth. Human waste once considered a gift to the soil has become toxic material that has broken the essential cycle of decay and regeneration. Here award winning author Derrick Jensen and activist Aric McBay weave historical analysis and devastatingly beautiful prose to remind us that life human and nonhuman will not go on unless we do everything we can to facilitate the most basic process on earth the root of sustainability one being s waste must always become another being s food. *The Derrick Jensen Reader* Derrick Jensen, 2012-07-03 In an age marked by seemingly unstoppable environmental collapse and the urgent quest for solutions environmental philosopher Derrick Jensen the voice of the growing deep ecology movement reveals for us new seeds of hope. Here for the first time in *The Derrick Jensen Reader* are collected generous selections from his prescient unflinching books on the problem of civilization and the path to true resistance. In the acclaimed *A Language Older Than Words* Jensen dissects his own abusive childhood to examine the pathology of Western culture and shares with us the power and beauty of an alliance with the natural world. He continues to use the lens of his own experience as well as the wisdom of philosophers activists and teachers to expose oppression and call us to action in his other early works *Listening to the Land* *A Culture of Make Believe* *Strangely Like War* and *Walking on Water*. We see his analysis deepen when he asks us to accept that the only moral response to biocide is resistance in the two volume *Endgame* a truth he explores further in *Thought to Exist in the Wild*. *What We Leave Behind* the graphic novel *As The World Burns* and in his two novels *Songs of the Dead* and *Lives Less Valuable*. And in *Dreams* Jensen s latest work he leads us still further toward his vision for a healed planet freeing us to see beyond the limits of our present culture to a future luminous with meaning. *Deep Green Resistance* Derrick Jensen, Aric McBay, Lierre Keith, 2011-01-04 For years Derrick Jensen has asked his audiences Do you think this culture will undergo a voluntary transformation to a sane and sustainable way of life. No one ever says yes. *Deep Green Resistance* starts where the environmental movement leaves off industrial civilization is incompatible with life. Technology can t fix it and shopping no matter how green won t stop it. To save this planet we need a serious resistance movement that can bring down the industrial economy. *Deep Green Resistance* evaluates strategic options for resistance from nonviolence to guerrilla warfare and the conditions required for those options to be successful. It provides an exploration of organizational structures recruitment security and target selection for both aboveground and underground action. *Deep Green Resistance* also discusses a culture of resistance and the crucial support role that it can play. *Deep Green Resistance* is a plan of action for anyone determined to fight for this planet and win. *Earth at Risk* Derrick Jensen, Lierre Keith, 2012-08-01 In America four hundred people own the wealth of more than half of the American population. We should not be saying tax the rich but instead we should be saying take their money and redistribute it take their property and redistribute it. Arundhati Roy Industrial civilization is devouring the planet and the

future The oceans are acidifying whole mountains have been laid to waste and the climate is teetering into chaos Every biome is approaching collapse And fifty years of environmentalism hasn't even slowed the rate of destruction Yet environmentalists are not considering strategies that might actually prevent the looming biocide we are facing Until Earth at Risk Earth at Risk Building a Resistance Movement to Save the Planet is an annual conference featuring environmental thinkers and activists who are willing to ask the hardest questions about the seriousness of our situation The conference is convened by Derrick Jensen acclaimed author of Endgame who has argued that we need a resistance movement against civilization itself The twelve people in this volume present an impassioned critique of the dominant culture from every angle William Catton Jr explains ecological overshoot Thomas Linzey gives a fiery call for community sovereignty Jane Caputi exposes patriarchy's mythic dismemberment of the Goddess Aric McBay discusses historically effective resistance strategies and Stephanie McMillan takes down capitalism One by one they build an unassailable case that we need to deprive the rich of their ability to steal from the poor and the powerful of their ability to destroy the planet These speakers offer their ideas on what can be done to build a real resistance movement one that includes all levels of direct action action that can actually match the scale of the problem Earth at Risk includes Derrick Jensen author of Endgame A Language Older than Words and many others Lierre Keith author of The Vegetarian Myth Food Justice and Sustainability coauthor of Deep Green Resistance Strategy to Save the Planet Nora Barrows Friedman journalist and photographer correspondent for outlets such as The Electronic Intifada Al Jazeera and Truthout.org Jane Caputi author of The Age of Sex Crime Gossips Gorgons and Crones The Fates of the Earth and Goddesses and Monsters Women Myth Power and Popular Culture William Catton Jr sociologist author of Overshoot The Ecological Basis of Revolutionary Change and Bottleneck Humanity's Impending Impasse Gail Dines a founding member of Stop Porn Culture author of Pornland How Porn Has Hijacked Our Sexuality Thomas Linzey executive director of the Community Environmental Legal Defense Fund Aric McBay coauthor of Deep Green Resistance Strategy to Save the Planet Stephanie Mcmillan cartoonist author of The Beginning of the American Fall organizer for the anti capitalist anti imperialist collective One Struggle Riki Ott marine biologist author of Not One Drop Betrayal and Courage in the Wake of the Exxon Valdez Oil Spill Arundhati Roy author of An Ordinary Person's Guide to Empire Field Notes on Democracy Listening to Grasshoppers and many others Waziyatawin historian and anti colonial activist author of For Indigenous Eyes Only What Does Justice Look Like The Struggle for Liberation in Dakota Homeland and other books

*Shadowing the Anthropocene: Eco-Realism for Turbulent Times* Adrian Ivakhiv, 2018 A spectre is haunting humanity the spectre of a reality that will outwit and in the end bury us The Anthropocene or The Human Era is an attempt to name our geological fate that we will one day disappear into the layer cake of Earth's geology while highlighting humanity in the starring role of today's Earthly drama In *Shadowing the Anthropocene* Adrian Ivakhiv proposes an ecological realism that takes as its starting point humanity's eventual demise The only question for a realist today he suggests is what to do now and what quality of compost

to leave behind with our burial The book engages with the challenges of the Anthropocene and with a series of philosophical efforts to address them including those of Slavoj Žižek and Charles Taylor Graham Harman and Timothy Morton Isabelle Stengers and Bruno Latour and William Connolly and Jane Bennett Along the way there are volcanic eruptions and revolutions ant cities and dog parks data clouds and space junk pagan gods and sacrificial altars dark flow souls of things and jazz Ivakhiv draws from centuries old process relational thinking that hearkens back to Daoist and Buddhist sages but gains incisive re invigoration in the philosophies of Charles Sanders Peirce and Alfred North Whitehead He translates those insights into practices of engaged Anthropocenic bodymindfulness aesthetic ethical and ecological practices for living in the shadow of the Anthropocene

*How Shall I Live My Life?* Derrick Jensen, 2011-01-26 In this collection of interviews Derrick Jensen discusses the destructive dominant culture with ten people who have devoted their lives to undermining it Whether it is Carolyn Raffensperger and her radical approach to public health or Thomas Berry on perceiving the sacred be it Kathleen Dean Moore reminding us that our bodies are made of mountains rivers and sunlight or Vine Deloria asserting that our dreams tell us more about the world than science ever can the activists and philosophers interviewed in *How Shall I Live My Life* each bravely present a few of the endless forms that resistance can and must take Interviews include George Draffan Jesse Wolf Hardin Vine Deloria David Abram Steven Wise Jan Lundberg David Edwards Thomas Berry Carolyn Raffensperger and Kathleen Dean Moore

**What Every Environmentalist Needs to Know about Capitalism** Fred Magdoff, John Bellamy Foster, 2011-06 Praise for Foster and Magdoff's *The Great Financial Crisis* In this timely and thorough analysis of the current financial crisis Foster and Magdoff explore its roots and the radical changes that might be undertaken in response This book makes a valuable contribution to the ongoing examination of our current debt crisis one that deserves our full attention Publishers Weekly There is a growing consensus that the planet is heading toward environmental catastrophe climate change ocean acidification ozone depletion global freshwater use loss of biodiversity and chemical pollution all threaten our future unless we act What is less clear is how humanity should respond The contemporary environmental movement is the site of many competing plans and prescriptions and composed of a diverse set of actors from militant activists to corporate chief executives This short readable book is a sharply argued manifesto for those environmentalists who reject schemes of green capitalism or piecemeal reform Environmental and economic scholars Magdoff and Foster contend that the struggle to reverse ecological degradation requires a firm grasp of economic reality Going further they argue that efforts to reform capitalism along environmental lines or rely solely on new technology to avert catastrophe misses the point The main cause of the looming environmental disaster is the driving logic of the system itself and those in power no matter how green are incapable of making the changes that are necessary *What Every Environmentalist Needs To Know about Capitalism* tackles the two largest issues of our time the ecological crisis and the faltering capitalist economy in a way that is thorough accessible and sure to provoke debate in the environmental movement

**Songs of the Dead**

Derrick Jensen, 2009-03-01 A serial killer stalks the streets of Spokane acting out a misogynist script from the dark heart of this culture Across town a writer named Derrick has spent his life tracking the reasons political psychological spiritual for the sadism of modern civilization And through the grim nights Nika a trafficked woman tries to survive the grinding violence of prostitution Their lives and the forces propelling them are about to collide Derrick s current project is a book called Possession which asks the ontological question of who is responsible for the culture of domination that s destroying the earth Who actually benefits from a dead planet the endgame that s fast approaching What if the answer is something way bigger than humans Meanwhile with motivations opposite to Derrick s the serial killer is asking much the same question of the women he kidnaps as his final act of possession and Nika is next Derrick s metaphysical explorations suddenly take on more urgency as visions both terrifying and sacred begin to intrude and past and future collapse without warning All Derrick knows is Nika s name and her impending death The only person who believes him is his partner Allison a woman with both strengths and scars whose past has led her to a commitment to justice no matter what the cost As the visions intensify and the killer draws nearer Derrick and Allison are compelled to act making themselves the next targets Derrick must learn to negotiate a world of spirits and demons living and dead before it s too late And what hangs in the balance is not just their lives but also the fate of life on earth With Songs of the Dead Derrick Jensen has written more than a thriller This is a story lush with rage and tenderness on its way to being a weapon *Tangled Roots* Matt Soltys, 2012 **Dreams** Derrick Jensen, 2011-01-04 Jensen s furthest reaching book yet Dreams challenges the destructive nihilism of writers like Richard Dawkins and Sam Harris who believe that there is no reality outside what can be measured using the tools of science He introduces the mythologies of ancient cultures and modern indigenous peoples as evidence of alternative ways of understanding reality informed by thinkers such as American Indian writer Jack Forbes theologian and American Indian rights activist Vine Deloria Shaman Martin Prechtel Dakota activist and scholar Waziyatawin and Okanagan Indian writer Jeannette Armstrong He draws on the wisdom of Dr Paul Stamets author of Mycelium Running How Mushrooms Can Help Save the World sociologist Stanley Aronowitz who discusses science s lack of accountability to the earth and many more As in his other books Jensen draws heavily from his own life experience living alongside the frogs redwoods snails birds and bears of the upper northwest about which he writes with exquisite tenderness Having taken on the daunting task of understanding one s dreams as a source of knowledge Jensen achieves the near impossible in this breathtakingly brave and ambitious new work **Capitalism in the Anthropocene** John Bellamy Foster, 2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the

earth as a whole generating at the same time an existential crisis for the world's population. What caused this massive shift in the history of the earth? In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest. The result is a planetary emergency that threatens all present and future generations, throwing into question the continuation of civilization and ultimately the very survival of humanity itself. Only by addressing the social aspects of the current planetary emergency, exploring the theoretical, historical, and practical dimensions of the capitalism's alteration of the planetary environment, is it possible to develop the ecological and social resources for a new journey of hope. The Ecological Rift John Bellamy Foster, Brett Clark, Richard York, 2011-11-01

Humanity in the twenty-first century is facing what might be described as its ultimate environmental catastrophe: the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it. All ecosystems on the planet are now in decline. Enormous rifts have been driven through the delicate fabric of the biosphere. The economy and the earth are headed for a fateful collision if we don't alter course. In The Ecological Rift: Capitalism's War on the Earth, environmental sociologists John Bellamy Foster, Brett Clark, and Richard York offer a radical assessment of both the problem and the solution. They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society, which expands individual riches at the expense of public wealth, including the wealth of nature. In the process, a huge ecological rift is driven between human beings and nature, undermining the conditions of sustainable existence: a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion. Critically examining the sanguine arguments of mainstream economists and technologists, Foster, Clark, and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended. Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy. Importantly, they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development. Political Spirituality in the Face of Climate Collapse James W. Perkinson, 2024-07-08. This book takes its motive force from our contemporary climate crisis. It seeks to reorient human and especially Christian understanding towards a more ecologically focused, indigenously informed way of living. James W. Perkinson argues that our current eco-climatic and socio-political emergency is the culmination of a 5,000-year history of supremacist settlement in which city-states first emergent in Mesopotamia and Egypt not only began coercively organizing labor into surplus production and ecosystems into inordinate and destructive yields of goods but in the process also simultaneously deform the spirit-world, haloing of natural phenomenon into outsized service of imperial reach. Perkinson recognizes globalized humanity as an emerging monstrosity destroying both human culture and the world. How we re-envision and revalue at our critical juncture our inescapable interdependence with the more-than-human world as peer and teacher and even elder is the central theme that throbs below the surface of the very disparate topics commanding

attention in each chapter      **And Social Justice for All** Lisa Van Engen, 2019-02-26 Equips parents to inspire kids to take on social injustice at any age With the constant barrage of difficult stories through news and social media today's kids are increasingly aware of the real problems real people confront every day And they're quicker than ever to come to parents and other trusted adults to ask how they can help or why they're not already doing so And Social Justice for All equips Christian families to tackle social justice issues together It inspires them to bring light and love to a dark and scary world Educator and mom Lisa Van Engen creates innovative resources to engage kids in understanding and responding to fourteen justice issues such as clean water creation care immigration and refugees hunger race and poverty After placing each issue in kid friendly context she offers interactive features High interest conversation starters for each age group to challenge thinking and assumptions A family devotional to anchor each social justice issue in God's Word Engaging age tiered activities for reading playing observing creating connecting and experimenting in God's world Tips and internet links to extend awareness and invest resources in social justice Throughout each chapter children speak their own thoughts about injustice and what they think God is calling them to do By looking at both the roots of injustice and what Christians can do right now to help And Social Justice for All empowers both adults and children to encounter a broken world with insight and empathy Simple yet powerful it lights the path for families to make a real God directed difference together      **This is Environmental Ethics:**
