Negotiating The Frontier Translators And Intercultures In Hispanic History:

Negotiating the Frontier Anthony Pym, 2014-06-03 Why would a Latin Qur'an be addressed to readers who knew no Latin What happens when translators work on paper rather than parchment Why would a Jewish rabbi translate a bible for Christians How can a theorist successfully criticize a version of Aristotle without knowing any Greek Why were children used to bring down an Amerindian civilization Why does the statue of Columbus in Barcelona point straight to Israel Why should a Nicaraguan poet cite a French poem in order to explain a volcano in Nicaragua This book does more than answer such questions It uses them to discuss some of the most fundamental and complex issues in contemporary Translation Studies and Cultural Studies Identifying cultural intermediaries as members of medieval frontier society it traces the stages by which that society has assisted in the creation of Hispanic cultures Individual case studies go from the twelfth century Christian Islamic and Jewish exchanges right through to the not unrelated complexity of today's translation schools in Spain mining a history rich in anecdote and paradox Further aspects trace key concepts such as disputation the medieval hierarchy of languages the nationalist mistrust of intermediaries the effects of decolonization on development ideology and the difficulties of training students for globalizing markets

Negotiating the Frontier Anthony Pym, 2000 Why would a Latin Qur'an be addressed to readers who knew no Latin What happens when translators work on paper rather than parchment Why would a Jewish rabbi translate a bible for Christians This book uses such questions to discuss some of the most fundamental and complex issues in contemporary Translation Studies and Cultural Studies

Beyond Descriptive Translation Studies Anthony Pym, Miriam Shlesinger, Daniel Simeoni, 2008 To go beyond the work of a leading intellectual is rarely an unambiguous tribute However when Gideon Toury founded Descriptive Translation Studies as a research based discipline he laid down precisely that intellectual challenge not just to describe translation but to explain it through reference to wider relations That call offers at once a common base an open and multidirectional ambition and many good reasons for unambiguous tribute The authors brought together in this volume include key players in Translation Studies who have responded to Toury's challenge in one way or another Their diverse contributions address issues such as the sociology of translators contemporary changes in intercultural relations the fundamental problem of defining translations the nature of explanation and case studies including pseudotranslation in Renaissance Italy Sherlock Holmes in Turkey and the coffee and sugar economy in Brazil All acknowledge Translation Studies as a research based space for conceptual coherence and creativity all seek to explain as well as describe In this sense we believe that Toury's call has been answered beyond expectations

Complicating the History of Western Translation Siobhán McElduff, Enrica Sciarrino, 2014-04-08 As long as there has been a need for language there has been a need for translation yet there is remarkably little scholarship available on pre modern translation and translators This exciting and innovative volume opens a window onto the complex world of translation in the multilingual and multicultural milieu of the ancient Mediterranean From the biographies of emperors to Hittites scribes in the second millennium BCE to a Greek speaking Syrian slyly resisting translation under the Roman empire the papers in this volume fresh and innovative contributions by new and established scholars from a variety of disciplines including Classics Near Eastern Studies Biblical Studies and Egyptology show that translation has always been a phenomenon to be reckoned with Accessible and of interest to scholars of translation studies and of the ancient Mediterranean the contributions in Complicating the History of Western Translation argue that the ancient Mediterranean was a translational society even when paradoxically cultures resisted or avoided translation Indeed this volume envisions an expansion of the understanding of what translation is how it works and how it should be seen as a major cultural force Chronologically the papers cover a period that ranges from around the third millennium BCE to the late second century CE geographically they extend from Egypt to Rome to Britain and beyond Each paper prompts us to reflect about the problematic nature of translation in the ancient world and challenges monolithic accounts of translation in the West **Is**

Science Western in Origin? C. K. Raju, 2009-09-11 On stock Western history science originated among the Greeks and then developed in post renaissance Europe This story was fabricated in three phases First during the Crusades scientific knowledge from across the world in captured Arabic books was given a theologically correct origin by claiming it was all transmitted from the Greeks The key cases of Euclid geometry and Claudius Ptolemy astronomy both concocted figures are used to illustrate this process Second during the Inquisition world scientific knowledge was again assigned a theologically correct origin by claiming it was not transmitted from others but was independently rediscovered by Europeans The cases of Copernicus and Newton calculus illustrate this process of revolution by rediscovery Third the appropriated knowledge was reinterpreted and aligned to post Crusade theology Colonial and racist historians exploited this arguing that the theologically correct version of scientific knowledge geometry calculus etc existed only in Europe These processes of appropriation continue to this day **Gender, Mediation, and Popular Education in Venice, 1760-1830** Susan Dalton, 2023-10-11

recommendations on rectifying problem areas *Evaluation and Translation* Carol Maier, 2014-04-23 The definition of value or quality with respect to work in translation has historically been a particularly vexed issue Today however the growing demand for translations in such fields as technology and business and the increased scrutiny of translators work by scholars in many disciplines is giving rise to a need for more nuanced more specialized and more explicit methods of determining value Some refer to this determination as evaluation others use the term assessment Either way the question is one of measurement and judgement which are always unavoidably subjective and frequently rest on criteria that are not overtly expressed This means that devising more complex evaluative practices involves not only quantitative techniques but also an exploration of the attitudes preferences or individual values on which criteria are established Intended as an interrogation and a critique that can serve to prompt a more thorough and open consideration of evaluative criteria this special issue of *The Translator* offers examinations of diverse evaluative practices and contains both empirical and hermeneutic work Topics addressed include the evaluation of student translations using more up to date and positive methods such as those employed in corpus studies the translation of non standard language translation into the second language terminology the application of theoretical criteria to practice a social textual perspective and the reviewing of literary translations in the press In addition reviews by a number of literary translators discuss specific translations both into and out of English *The Ottoman World* Christine Woodhead, 2011-12-15 The Ottoman empire as a political entity comprised most of the present Middle East with the principal exception of Iran north Africa and south eastern Europe For over 500 years until its disintegration during World War I it encompassed a diverse range of ethnic religious and linguistic communities with varying political and cultural backgrounds Yet was there such a thing as an Ottoman world beyond the principle of sultanic rule from Istanbul Ottoman authority might have been established largely by military conquest but how was it maintained for so long over such distances and so many disparate societies How did provincial regions relate to the imperial centre and what role was played in this by local elites What did it mean in practice for ordinary people to be part of an Ottoman world Arranged in five thematic sections with contributions from thirty specialist historians *The Ottoman World* addresses these questions examining aspects of the social and socio ideological composition of this major pre modern empire and offers a combination of broad synthesis and detailed investigation that is both informative and intended to raise points for future debate *The Ottoman World* provides a unique coverage of the Ottoman empire widening its scope beyond Istanbul to the edges of the empire and offers key coverage for students and scholars alike *Introducing New Hypertexts on Interpreting (Studies)* Cornelia Zwischenberger, Karin Reithofer, Sylvi Rennert, 2023-04-15 The contributions in this volume are a reflection of the entire range of *Interpreting Studies* from explorations of research methodology and interpreting quality research to public service interpreting today and in the past risk management strategies in court interpreting and the interdependencies of interpreters in project networks They address questions such as who can be called an interpreter present new approaches to interpreter

issues of research design and methodology and goes on to examine the kind of disciplinary knowledge produced in translation studies who produces it and whose interests the dominant paradigms serve The focus is on historical and ideological problems but the crisis of representation that has affected all the human sciences in recent decades has left its mark As the essays in this collection explore the transgressive nature of crosscultural representation whether in translations or in the study of translation they remain attentive to institutional contexts and develop a self reflexive stance They also chart new territory taking their cue from ethnography semiotics sociology and cultural studies and tackling Meso American iconic scripts Bourdieu s constructivism translation between philosophical paradigms and the complexities of translation concepts in multicultural societies Beyond Greek Denis Feeney,2016-01-01 Ancient Roman authors are firmly established in the Western canon and yet the birth of Latin literature was far from inevitable The cultural flourishing that eventually produced the Latin classics was one of the strangest events in history as Denis Feeney demonstrates in this bold revision
