Ralarala, Salochana Lorraine Hassan, Rajani Naidoo, 2021-05-25 Knowledge remains timely in education The need for academics to contemplate its relevance worth use and everything in between deems a continuous intellectual project rather than a conundrum to be solved This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge Through original research and the voices of academics and students this book argues for repurposing knowledge generation knowledge sharing and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained The contentious tensionalities that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines Prof Shan Simmonds PhD NWU This edited volume bristles with fresh scholarly approaches and insights of an emergent generation of engaged scholars grappling with the issues and problems of higher education in South Africa The issues dealt with here are varied and encompassing They are treated with intellectual delicacy and probing sensitivity articulacy informed data and bold conclusions They serve well Prof Kwesi Kwaa Prah Emeritus Professor of Sociology University of the Western Cape Founder of the Centre for Advanced Studies of African Society *Transforming Transformation in Research and Teaching at South African Universities* Rob Pattman, Ronelle Carolissen, 2018-12-21 What is transformation in contemporary South African higher education How can it be facilitated through research and pedagogic

Financial Mail ,2006-06 Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities

and Psychology *Contemporary India and South Africa* Sujata Patel, Tina Uys, 2013-11-12 This book deals with the legacies of the Indian experiences of migration and diaspora in South Africa It highlights the social imaginaries of the migrants and citizens as they negotiate between a reconstructed notion of India and their real present and future in the country of citizenship Both South Africa and India have had a long history of group based identity movements against exploitation around caste and race intersecting with class gender language religion and region The combined history has allowed them to participate in novel ways in the global arena as regional powers The book suggests that the question of identity concerns itself with exploitation and oppression of excluded groups in both countries The authors are particularly attentive to the manner in which the two democratic states have confronted the challenges of history together with contemporary demands of inclusion and discuss the dilemmas involved in resolving them The volume also raises questions regarding future roles especially in the fields of education and the environment It will be of interest to those in the fields of sociology political science international relations history migration and diaspora studies as well as to the general reader **Feeling lives: An**

intersectional exploration of past experiences and present living Lindsay Clowes, LJ Theo, Nadia Sanger, Landa Mabenge, Sisa Ngabaza, 2023-11-15 We each make sense of the world through our embodied feeling lives We do it through the social groupings contexts and processes which history rather than biology presents and assigns to us In this collection we aim to illustrate how these embodied feelings and emotions underpin contemporary theorising by sharing reflective autobiographical writing by individuals from a wide range of backgrounds and contexts This somewhat unruly collection unsettles conventional academic writing precisely because authors have grounded themselves in the tangible and the personal rather than in abstract theory We hope that readers might see aspects of their own lives in some of these stories develop better understandings of lives that are experienced very differently and start or continue to theorise their own lives

Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries Ngulube, Patrick, 2016-09-29 Knowledge systems are an essential aspect to the preservation of a community's culture In developing countries this community based knowledge has significant influence on such things as decision making and problem solving The Handbook of Research on Social Cultural and Educational Considerations of Indigenous Knowledge in Developing Countries is an authoritative reference source for the latest scholarly research on the importance of knowledge and value systems at the community level and ways indigenous people utilize this information Highlighting impacts on culture and education in developing nations this book is ideally designed for researchers academicians policy makers students and professionals interested in contemporary debates on indigenous knowledge systems *Precarious Power* Susan Booysen, 2021-02-01 An incisive analysis of South Africa's ANC power as party as government as state South Africa's African National Congress ANC is in decline its hegemony has been weakened its legitimacy diluted President Cyril Ramaphosa's appointment suspended the ANC's electoral decline it also heightened

internal tensions between those who would deepen its acquired status as corrupt and captured and those who would remodel it as redeemable. These are the incontrovertible knowns of South African politics; what will evolve from this is less certain. In *Precarious Power*, renowned political scientist Susan Booysen uses in-depth research and analysis to distill that which is bound to shape South Africa's political future. Booysen focuses on contradictory party politics and internal ANC dissent that is veiled for the sake of retaining an electoral following. Also exposed is the incongruous populist policymaking, protest politics, and the use of soft law to ensure it does not alienate angry citizens fueling further discontent and protest. The ANC's power has become exceedingly precarious. *Precarious Power* is the name of the political game for the foreseeable future. The comprehensive analysis in *Precarious Power* will appeal not only to political scientists and postgraduate students but to all who take a keen interest in current affairs.

The Formation of Intellectual Capital and Its Ability to Transform Higher Education Institutions and the Knowledge Society Cardoso Espinosa, Edgar Oliver, 2019-06-28

The knowledge society arises from the combination of four interdependent elements: the production of knowledge through research; its transmission through education; its dissemination through information and communication technologies; and its exploitation through innovation. For this reason, higher education institutions (HEIs) are the main component of the formation of intellectual capital because they are the key element of the knowledge society; so it is necessary that they continue to be the main source of the necessary skills that allow the increase of economic competitiveness, sustainability, and citizen welfare within the framework of quality education and equity.
