Enterprise Information Systems, Joaquim Filipe, 2013-11-11. This book includes a set of selected papers from the first International Conference on Enterprise Information Systems (ICEIS 99) held in Setúbal, Portugal, from 27 to 30 March 1999. ICEIS focuses on real-world applications and aims at becoming a major point of contact between research scientists, engineers, and practitioners in the area of business applications of information systems. This year, four simultaneous tracks were held, covering different aspects related to enterprise computing, including Systems Analysis and Specification, Database Technology and its Applications, Artificial Intelligence and Decision Support Systems, and Internet and Intranet Computing. Although ICEIS 99 received more than 200 submissions, only 96 papers were accepted for oral presentation, and only 24 were selected for inclusion in this book. These numbers demonstrate stringent quality criteria and the intention of maintaining a high-quality forum for future editions of this conference. A number of additional keynote lectures, case studies, and technical tutorials were also held. These presentations by specialists in different knowledge areas made an important contribution to increase the overall quality of the Conference and are partially expressed in the first two papers of the book.
