What Should Armies Do Armed Forces And Civil Security:

What Should Armies Do? John L. Clarke, 2016-02-17 Clarke examines the role of North American and European armed forces in support of civil authorities in domestic contingencies. He seeks to answer the question of what roles are and are not appropriate for contemporary armed forces in carrying out tasks and functions within national borders. The book takes as its starting point two key elements in the North American and European security debate: the decline of both the external threats to most North American and European states and that of budgetary resources available for defense. These twin declines are coupled with a desire on the part of civil leaders to engage the military in more domestic tasks and the desire of senior military leaders to preserve force structure, resulting in a dynamic in which civil leaders will ask their militaries to do more and military leaders will be more inclined to say yes. As such, this book focuses on the enormous increase in the provision of non-military services and support asked of North American and European military establishments. Looking at the historical context for how North America's and Europe's armed forces have been employed in the past, this book establishes guidelines for their employment in the future.

Lochard, 2019-02-08 The region of South East Europe (SEE) which is home to both NATO and Partnership for Peace (PfP) countries serves as an important corridor between Europe and the Middle East, North Africa and the Caucasus. In recent years, however, SEE has also experienced high levels of cross-border military and defense-related challenges in the form of migration, smuggling, terrorism, and cyber threats. Furthermore, the use of the new information environment (IE) to further extremism in SEE and elsewhere in NATO and PfP countries has had far-reaching command and control (C2) implications for the Alliance. A collaborative interdisciplinary international and regional approach is clearly needed to adequately assess and address these hybrid threats. This book presents papers delivered at the NATO Science for Peace and Security (SPS) event Senior Leadership Roundtable on Military and Defense Aspects of Border Security in South East Europe held in Berovo, the Former Yugoslav Republic of Macedonia, from 23-30 September 2017. The aim of this special SPS grant was to maximize opportunities for extensive dialogue and collaboration between senior regional members and the almost 70 distinguished academic and legal experts as well as current or former senior level practitioners from various governments, NATO bodies,

and international organization that participated It was the first SPS event of its kind in SEE as well as the first NATO SPS grant to be co executed by the U S Department of Defense via the U S National Defense University Other co organizers were the C4I and Cyber Center of Excellence at George Mason University and PfP partner institution the General Mihailo Apostolski Military Academy Skopje Associate Member of the University of Goce Del ev Stip The book is divided into five parts global trends defining the problem policy and academic solutions national and regional case studies and technological solutions It will prove an invaluable source of reference for all those with an interest in the SEE region as well as cross border hybrid threats in general Turkey recognizes the Republic of Macedonia with its constitutional name

U.S. Army War College Guide to National Security Issues:

National security policy and strategy J. Boone Bartholomees, 2008 The U S Army War College Guide USAWC to National Security Issues is the latest edition of the U S Army War College Guide to National Security Policy and Strategy which the college has published sporadically under different titles since 2001 This edition of the Guide is in two volumes that correspond roughly to the two core courses that the Department of National Security and Strategy DNSS teaches Theory of War and Strategy and National Security Policy and Strategy Page vii *Israel's Civil-Military Relations and Security Sector Reform* Ian Westerman, 2024-02-13 This book examines Israel's civil military relations CMR in order to explore alternatives to orthodox Western models of security sector reform SSR in post conflict societies This book argues that the guidelines of SSR have always tended to draw on theoretical work in the field of CMR and focus too heavily on Western liberal democratic models of governance Consequently reform programs based on these guidelines and intended for use in post conflict and conflict affected states have had at best mixed results The book challenges the necessity for this over reliance on traditional Western liberal democratic solutions and instead advocates an alternative approach It proposes that by drawing on an unconventional CMR model that in turn references the specific context and cultural background of the particular state being subject to reform there is a significantly higher chance of success Drawing on a case study of Israel's CMR the author seeks to provide practical assistance to those working in this area and considers the question of how this unorthodox CMR model might usefully inform post conflict and conflict affected SSR programmes This book will be of interest to students of military studies security studies Israeli politics and International Relations
