*Youth and Popular Culture in Africa* Paul Ugor, 2021 The edited collection focuses on the links between young people and African popular culture It explores popular culture produced and consumed by young people in contemporary Africa And by culture we mean all kinds of texts or representations visual oral written performative fictional social and virtual created by African youth mostly about their lives and their immediate societies and for themselves but also consumed by the larger public and shared locally and globally We proceed from the premise that cultural texts not only function as social facts as Karin Barber argues but that they double as commentaries upon and interpretations of social facts They are part of social reality but they also take up an attitude to social reality 2007 04 So the work focuses specifically on what African youth produce as popular culture under what conditions or contexts they produce such work how they produce those texts why they produce them the aesthetic dimensions of these texts as cultural artifacts and why these textual practices matter as social facts as interpretive acts and as cultural symbols of the general cultural activism of young people in a rapidly changing world a world where the global cultural economy is the prime terrain for the relentless struggles over the meanings that come to shape political economic and social systems

**Triggers** Anne Breitbarth, Henk van Riemsdijk, 2008-08-22 The concept of trigger is a core concept of Chomsky's Minimalist Program The idea that certain types of movement are triggered by some property of the target position is at least as old as the notion that the movement of noun phrases to the subject position is triggered by their need to receive nominative case In more recent versions of syntactic theory triggering mechanisms are thought to regulate all of movement Furthermore a quite narrow range of triggering mechanisms is permitted As is to be expected such a restrictive approach meets a variety of difficulties Specifically the question is whether all triggering elements required to cover displacement of all kinds in natural language can be independently motivated Further how can a trigger theory which crucially relies on the idea that all movement is obligatory deal with apparently optional movement processes Are features an adequate means to express the triggering function in all cases More radically are all movement phenomena really the result of the checking of trigger features And what about apparent triggering factors that are external to syntax such as prosody can they be captured in a rigid trigger theory In other words could certain aspects of triggered movement be due to interface conditions Such is the range of questions addressed by the fourteen contributions to this book They cover a considerable range of languages including Afrikaans Breton Bulgarian Dutch English French German Gungbe Hungarian Italian Japanese Kiswahili Romanian These papers present materials both empirical and theoretical that will not fail to have considerable impact on the further development of the concept of trigger in syntactic theory

**Issues in Formal German(ic) Typology** Werner Abraham, C. Jan-Wouter Zwart, 2002 This book takes up a variety of general syntactic topics which either yield different solutions in German in particular or which lead to different conclusions for theory formation One of the main topics is the fact that languages that allow for extensive scrambling between the two verbal poles V2 and Vlast need to integrate discourse functions like thema and rhema into the grammatical description This is attempted in terms of Minimalism thus extending the functional domain Special attention is given to the asymmetrical scrambling behavior of indefinites vs definites and their semantic interpretation Related topics are Transitive expletive sentences types of existential sentences with either BE or HAVE the that trace phenomenon and its semantics negative polarity items ellipsis and gapping passivization double negation all of which have extensive effects both on distributional behavior and semantic disambiguation reaching far beyond effects observable in English with its rigid unscramble word order

Theoretical Approaches to Disharmonic Word Order

Theresa Biberauer, Michelle Sheehan, 2013-11 This title considers whether any generalisations can be made about word order in language The chapters written by international scholars draw on data from several disharmonic and typologically distinct languages including Mandarin Chinese Basque French English Hixkaryana a Cariban language Khalkha Mongolian Uyghur Turkic and Afrikaans      Cyclical Change Elly van Gelderen, 2009 Linguistic Cycles are ever present in language change and involve a phrase or word that gradually disappears and is replaced by a new linguistic item The most well known cycles involve negatives where an initial single negative such as not is reinforced by another negative such as no thing and subjects where full pronouns are reanalyzed as endings on the verb This book presents new data and insights on the well known cyclical changes as well as on less well known ones such as the preposition auxiliary copula modal and complementation cycles Part I covers the negative cycle with chapters looking in great detail at the steps that are typical in this cycle Part II focuses on pronouns auxiliaries and the left periphery Part III includes work on modals prepositions and complementation The book ends with a psycholinguistic chapter This book brings together linguists from a variety of theoretical frameworks and contributes to new directions in work on language change      **Urban Transportation Abstracts** ,1986      Comparative Studies in Germanic Syntax Jutta Hartmann, László Molnárfi, 2006 This selection of papers presented at the 20th Comparative Germanic Syntax Workshop brings together contributions that address issues in syntactic predication and studies in the nominal system as well as papers on data from the history of English and German Showing a strong comparative commitment the contributions include studies on previously neglected data on case and predicative structures in Icelandic and other Germanic languages on the non syntactic distinction of predicative vs argument NP DPs on quirky V2 in Afrikaans the pronominal system resumptive pronouns with relative clauses in Zurich German as well as historical papers on word formation processes on auxiliary selection in relation to counter factuality and on the development of VO OV orders in the history of English This volume presents a wide range of studies that enrich both the theoretical understanding and the empirical foundation of comparative research on the Germanic languages      **Structure Preserved** C. Jan-Wouter Zwart, Mark de Vries, 2010 Structure is at the rock bottom of all explanatory sciences Jan Koster Forty years ago the hypothesis that underlying the bewildering variety of syntactic phenomena are general and unified structural patterns of unexpected beauty and simplicity gave rise to major advancements in the study of Dutch and Germanic syntax with important implications for the theory of grammar as a whole Jan Koster was one of the central figures in this development and he has continued to explore the structure preserving hypothesis throughout his illustrious career This collection of articles by over forty syntacticians celebrates the advancements made in the study of syntax over the past forty years reflecting on the structural principles underlying syntactic phenomena and emulating the approach to syntactic analysis embodied in Jan Koster's teaching and research      **Nuclear Science Abstracts** ,1975-03      **South African Mining and Engineering Journal** ,1979      **The Construal of Space in Language and Thought** Martin Pütz, René Dirven, 2011-07-11 No detailed
