Hawkins, 2023-04-18 Prove It A Climate Revelation for People Just like You presents a readable nontechnical explanation of what does and does not cause climate change The conclusions are new to the climate debate they are demonstrably proven and they convey the feeling of comfort that follows naturally from plain spoken truth The book s theme Climate cycles not climate change is supported by proven science in many disciplines Because highly relevant proven facts are being widely ignored there is a need for understanding by the people of all the facts before prudent policy can be set The book directly challenges the prevailing settled science of climate theories in the United States which is demonstrably incorrect If left unchallenged these theories will cause economic and psychological damage to many people for many years to come Short chapters in the book are devoted to what is in fact very complex science e g photosynthesis changes in the earth s orbit about the sun and the critical importance of CO₂ in the oceans and atmosphere to sustain life on earth The perhaps surprising definition of fossil fuels as stored solar energy is directly related to the documented decline of atmospheric CO₂ content over the last 500 million years We present a hypothesis as to why this decline in CO₂ is happening There is a playful tone for example CO₂ is introduced with the metaphor of Beauty and the Beast with CO₂ the source of life widely feared as the Beast embodiment of the evils of industrialization The story is child friendly definitely not nightmare material In summary the ultimate aim of this book is to inform and teach and the ultimate audience is the students of present and future generations **CK-12 Biology Teacher's Edition** CK-12 Foundation, 2012-04-11 CK 12 Biology Teacher s Edition complements the CK 12 Biology Student Edition FlexBook
