Statistical Methods and Applications from a Historical Perspective Fabio

Crescenzi,Stefania Mignani,2014-06-19 The book showcases a selection of peer reviewed papers the preliminary versions of which were presented at a conference held 11 13 June 2011 in Bologna and organized jointly by the Italian Statistical Society SIS the Institute national Institute of Statistics ISTAT and the Bank of Italy The theme of the conference was Statistics in the 150 years of the Unification of Italy The celebration of the anniversary of Italian unification provided the opportunity to examine and discuss the methodological aspects and applications from a historical perspective and both from a national and international point of view The critical discussion on the issues of the past has made it possible to focus on recent advances considering the studies of socio economic and demographic changes in European countries **Computer Aided Systems**

Theory - EUROCAST'99 Franz Pichler,Roberto Moreno-Diaz,Peter Kopacek,2007-03-02 Computer Aided Systems Theory

CAST deals with the task of contributing to the creation and implementation of tools for the support of usual CAD tools for design and simulation by formal mathematical or logical means in modeling Naturally

thebasisfortheconstructionandimplementationofCASTsoftwareis provided by the existing current knowledge in modeling and by the experience of practitioners in engineering design Systems Theory as seen from the viewpoint of CAST research and

CAST tool development has the role of providing formal frameworks and related theoretical knowledge for model construction and model analysis. We purposely do not distinguish sharply between systems theory and CAST and other similar fields of research and tool development such as for example in applied numerical analysis or other computational sciences. The here documented EUROCAST conference which took place at the Vienna University of Technology reflects current mainstreams in CAST. As in the previous conferences new topics both theoretical and application oriented have been addressed. The presented papers show that the field is widespread and that new developments in computer science and in information technology are the driving forces. The editors would like to thank the authors for providing their manuscripts in hard copy and in electronic form on time. The staff of Springer Verlag Heidelberg gave as in previous CAST publications valuable support in editing this volume.
