The text introduces a global view and many new exciting topics into managerial economics such as firm architecture, the evolution of the creative firm, Porter's strategic framework, business ethics, electronic commerce, and risk management, and shows how managerial decisions are actually made with more than 140 real world cases. *Whitaker's Cumulative Book List*, 1982 *Journal of Economic Literature*, 1989

Urban Services to Ecosystems Chiara Catalano, Maria Beatrice Andreucci, Riccardo Guarino, Francesca Bretzel, Manfredi Leone, Salvatore Pasta, 2021-09-15 The aim of this book is to bring together multidisciplinary research in the field of green infrastructure design, construction, and ecology. The main core of the volume is constituted by contributions dealing with green infrastructure, vegetation science, nature based solutions, and sustainable urban development. The green infrastructure and its ecosystem services indeed are gaining space in both political agendas and academic research. However, the attention is focused on the services that nature is giving for free to and for human health and survival. What if we start to see things from another perspective? Our actions shall converge for instance to turn man made environment like cities from heterotrophic to autotrophic ecosystems. From landscape ecology to urban and building design like bricks of a wall from the small scale to the bigger landscape scale via ecological networks and corridors we should start answering these questions: what are the services that are we offering to Nature? What are we improving? How to implement our actions?
