Rappaport, Brian D. Woerner, Jeffrey H. Reed, 2012-12-06 Wireless personal communications or wireless as it is now being called has arrived The hype is starting to fade and the hard work of deploying new systems and services for personal communications is underway In the United States the FCC propelled the wireless era from infancy to mainstream with a 7 7 billion auction of 60 MHz of radio spectrum in the 1800-1900 MHz band With the largest single sale of public property in the history of mankind mostly complete the resources of the entire world are being called upon to develop inexpensive rapidly deployable wireless systems and subscriber units for an industry that is adding subscribers at greater than 50% annual rate This growth is commonplace for wireless service companies throughout the world and in the U S where as many as 7 licensed wireless service providers may be competing for cellular PCS customers within the next couple of years differentiators in cost quality service and coverage will become critical to customer acceptance and use Many of these issues are discussed in the papers included in this book **Mobile and Wireless Networks** Khaldoun Al Agha, Guy Pujolle, Tara Ali Yahya, 2016-08-17 This book presents the state of the art in the field of mobile and wireless networks and anticipates the arrival of new standards and architectures It focuses on wireless networks starting with small personal area networks and progressing onto the very large cells of wireless regional area networks via local area networks dominated by WiFi technology and finally metropolitan networks After a description of the existing 2G and 3G standards with LTE being the latest release LTE A is addressed which is the first 4G release and a first indication of 5G is provided as seen through the standardizing bodies 4G technology is described in detail along with the different LTE extensions related to the massive arrival of femtocells the increase to a 1 Gbps capacity and relay techniques

5G is also discussed in order to show what can be expected in the near future The Internet of Things is explained in a specific chapter due to its omnipresence in the literature ad hoc and mesh networks form another important chapter as they have made a comeback after a long period of near hibernation and the final chapter discusses a particularly recent topic Mobile Edge Computing MEC servers
