Vosniakos, 2012-04-26 The book deals with various consequences of major nuclear accidents such as in 1986 in Chernobyl and in 2011 in Fukushima. The public is extremely interested in learning more about the movements and risks posed by radiation in the environment related to food supply and food safety. Radionuclides are found in air, water, soil and even in us not only after nuclear accidents because they occur also in nature. Every day we ingest and inhale radionuclides in our air and food and the water. This book provides a solid underpinning of the basic physical chemistry and biogeochemistry of naturally occurring and anthropogenic radioactivity. The mechanisms of radioactive element transfer in the atmosphere, tropospheric and stratospheric diffusion of radioactivity, environmental contamination from accidents and the impact of atmospheric pollution on the food chain, soil and plants are analyzed and the analytical methods are illustrated. The question of natural radioactivity concentration in building materials is addressed too. While the book contains many case studies and data for Greece, it is of general value. It contributes to the development of international environmentally safe standards and economically reasonable standard regulations based on justified radiological, social and economical legislation concepts.

Handbook of Environmental Analysis Pradyot Patnaik, 2017-08-23 The Handbook will cover all aspects of environmental analysis and will examine the emergence of many new classes of pollutants in recent years. It will provide information on an array of topics from instrumentation, analytical techniques and sample preparations to statistical calculations, chemical

structures and equations It will present the tools and techniques required to measure a wide range of toxic pollutants in our environment It will be fully revised throughout and will add four new chapters Microbial Analysis Chlorophyll Chlorine Chloramines and Chlorine Dioxide and Derivatization Reactions in Environmental Analysis **The Bookseller** ,1979
