Atmospheric and Space Flight Dynamics Ashish Tewari, 2007-05-08 This book offers a unified presentation that does not discriminate between atmospheric and space flight. It demonstrates that the two disciplines have evolved from the same set of physical principles and introduces a broad range of critical concepts in an accessible yet mathematically rigorous presentation. The book presents many MATLAB and Simulink based numerical examples and real world simulations. Replete with illustrations, end of chapter exercises and selected solutions, the work is primarily useful as a textbook for advanced undergraduate and beginning graduate level students.
