These problem sets give students the opportunity to test their comprehension, challenge their understanding, and apply their knowledge to real world situations. These extensive exercises give students the opportunity to test their comprehension, challenge their understanding, and apply their knowledge to real world situations.

Differential Equations with Boundary-value Problems Dennis G. Zill, Michael R. Cullen, 1997. This Fourth Edition of the expanded version of Zill's best selling A FIRST COURSE IN DIFFERENTIAL EQUATIONS WITH MODELING APPLICATIONS places an even greater emphasis on modeling and the use of technology in problem solving and now features more everyday applications. Both Zill texts are identical through the first nine chapters, but this version includes six additional chapters that provide in depth coverage of boundary value problem solving and partial differential equations subjects just introduced in the shorter text. Previous editions of these two texts have enjoyed such great success in part because the authors pique students' interest with special features and in-text aids. Pre-publication reviewers also praise the authors' accessible writing style and the text's organization, which makes it easy to teach from and easy for students to understand and use. Understandable step by step solutions are provided for every example. And this edition makes an even greater effort to show students how the mathematical concepts have relevant everyday applications. Among the boundary value related topics covered in this expanded text are plane autonomous systems and stability, orthogonal functions, Fourier series, the Laplace transform, and elliptic, parabolic, and hyperparabolic partial differential equations and their applications.

A First Course in Differential Equations Dennis G. Zill, 1993. % mainly for math and engineering majors % clear concise writing style is student oriented % graded problem sets with many diverse problems range from drill to more challenging problems % this course follows the three semester calculus sequence at two and four year schools.
