*Advanced Testing of Systems-of-Systems, Volume 1* Bernard Homès, 2022-12-09. As a society today we are so dependent on systems of systems that any malfunction has devastating consequences both human and financial. Their technical design, functional complexity and numerous interfaces justify a significant investment in testing in order to limit anomalies and malfunctions. Based on more than 40 years of practice in the development and testing of systems including safety-critical systems, this book discusses development models, testing methodologies and techniques and identifies their advantages and disadvantages. Pragmatic and clear, this book displays many examples and references that will help you improve the quality of your systems of systems efficiently and effectively and lead you to identify the impact of upstream decisions and their consequences. *Advanced Testing of Systems of Systems 1* is complemented by a second volume dealing with the practical implementation and use of the techniques and methodologies proposed here.

*Advanced Research Methods in the Built Environment* Andrew Knight, Les Ruddock, 2009-03-16. This book provides a bridge between the introductory research methods books and the discipline-specific higher-level texts. Its unique feature is the coverage of the detailed process of research rather than the findings of research projects. Chapter authors have been carefully selected by their expertise, discipline and location to give an eclectic range of perspectives. Particular care has been taken to balance positivist with interpretivist approaches throughout. The authors' focus is on the practical consequences of research philosophies, strategies and techniques by using their own research and by evaluating the work of others. *Advanced Research Methods in the Built Environment* addresses common topics raised by postgraduate-level researchers rather than dealing with all aspects of the research process. Issues covered range from the practicalities of producing a journal article to the role of theory in research. The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research.
