Furnham, 2016-07-30 If you only read one book on leadership this year, make it this one. Leadership experts David Pendleton and Adrian Furnham present an innovative model for leadership success in a turbulent world. When times are hard, leadership makes the greatest difference. This thoroughly updated second edition shows how to make the kind of difference that all organizations, both public and private sector, want and need. Early chapters show the powerful effect leadership can have on organizations; subsequent chapters present new ideas that are elegantly simple, conceptually coherent, and radically different, based on the best research in the field. The ideas in this book have also been tested in major multinational organizations over recent years. The aim is to provide leaders and those who work with them with a practical guide to how to increase the effectiveness of leadership in any organization.

Leadership and Organization in the Aviation Industry Dr Marc-Philippe Lumpé, 2012-10-01 Leadership and organisational structures which are not adjusted to the cultural background of the employees concerned are most likely to produce sub-optimal results. House (2004) Therefore it is necessary to develop appropriate leadership and organisational structures in order to fully grasp the cultural environment to be encountered in the professional world. This book presents a research project that was carried out to develop leadership and organisational structures in accordance with the requirements created by different professional backgrounds within the aviation industry. The identification of the different professional cultures was undertaken using a standardised questionnaire. The development of the questionnaire was carried out with the help of the GLOBE study. House et al. (2004) one of the most extensive research efforts ever undertaken in the field of organisational and national cultures. The main characteristic of the GLOBE study is the development of nine dimensions which serve to identify and characterise any culture. These dimensions are referred to as core cultural dimensions. Using this newly developed questionnaire it was not only possible to isolate 12 different professional cultures but also to

identify their distinguishing traits which served as the base for the subsequent development of leadership and organisational structures The survey was complemented by open interviews served to broaden and deepen the results gained with the standardised questionnaire The research outcomes open the door to a new and important element of cultural research complementary to those of organisational and national cultures Although the study was carried out in the aviation industry the results gained also appear to be transferable to other industries due to the large variety of professions isolated within the course of the presented study and the specific nature of the aviation industry itself
