*Introduction to Differential Equations with Dynamical Systems* Stephen L. Campbell, Richard Haberman, 2011-10-14 Many textbooks on differential equations are written to be interesting to the teacher rather than the student *Introduction to Differential Equations with Dynamical Systems* is directed toward students This concise and up to date textbook addresses the challenges that undergraduate mathematics engineering and science students experience during a first course on differential equations And while covering all the standard parts of the subject the book emphasizes linear constant coefficient equations and applications including the topics essential to engineering students Stephen Campbell and Richard Haberman using carefully worded derivations elementary explanations and examples exercises and figures rather than theorems and proofs have written a book that makes learning and teaching differential equations easier and more relevant The book also presents elementary dynamical systems in a unique and flexible way that is suitable for all courses regardless of length
