Gibbs, 2013-03-14 In the last two decades technological advances in isotope ratio mass spectrometry have been very rapid opening up new possibilities for analysis of biological and environmental materials The new instrumentation has facilitated faster analysis of samples via automated sample preparation and multi isotope analysis of single samples resulting in considerable cost savings and enabling access to isotope analysis for many more researchers These changes are reflected in the rapidly growing international literature on stable isotopes While there have been some excellent books and review papers aimed at interpreting isotope signals in biology and environmental science there have been fewer attempts to provide practical tools for researchers making forays into this exciting new arena This book aims to address this inadequacy by providing a set of practical guidelines for the application of a range of novel and well proven stable isotope techniques to the fields of plant physiological ecology agriculture marine ecology and palaeoecology The book is the outcome of a weeklong workshop held under the auspices of the Cooperative Research Centre for Legumes in Mediterranean Agriculture CLIMA 1992 2000 at The University of Western Australia and the CSIRO Floreat Laboratories Perth Western Australia in February 1999 The workshop was designed to provide practical tools and experiences for researchers and students concerned with how one goes about using stable isotopes in field investigations Catalogue of Hazardous and Solid Waste Publications
