The CERT Oracle Secure Coding Standard for Java Fred Long, 2012 In the Java world security is not viewed as an add on a feature It is a pervasive way of thinking Those who forget to think in a secure mindset end up in trouble But just because the facilities are there doesn't mean that security is assured automatically A set of standard practices has evolved over the years The Secure Coding Standard for Java™ is a compendium of these practices These are not theoretical research papers or product marketing blurbs This is all serious mission critical battle tested enterprise scale stuff James A Gosling Father of the Java Programming Language An essential element of secure coding in the Java programming language is a well documented and enforceable coding standard Coding standards encourage programmers to follow a uniform set of rules determined by the requirements of the project and organization rather than by the programmer's familiarity or preference Once established these standards can be used as a metric to evaluate source code using manual or automated processes The CERT Oracle Secure Coding Standard for Java™ provides rules designed to eliminate insecure coding practices that can lead to exploitable vulnerabilities Application of the standard's guidelines will lead to higher quality systems robust systems that are more resistant to attack Such guidelines are required for the wide range of products coded in Java for devices such as PCs game players mobile phones home appliances and automotive electronics After a high level introduction to Java application security seventeen consistently organized chapters detail specific rules for key areas of Java development For each area the authors present noncompliant examples and corresponding compliant solutions show how to assess risk and offer references for further information Each rule is prioritized based on the severity of consequences likelihood of introducing exploitable vulnerabilities and cost of remediation The standard provides secure coding rules for the Java SE 6 Platform including the Java programming language and libraries and also addresses new features of the Java SE 7 Platform It describes language behaviors left to the discretion of JVM and compiler implementers guides developers in the proper use of Java's APIs and security architecture and considers security concerns pertaining to standard extension APIs from the javax package hierarchy The standard covers security issues applicable to these libraries lang util Collections Concurrency Utilities Logging Management Reflection Regular Expressions Zip I O JMX JNI Math Serialization and JAXP

Engineering Secure Software and Systems Fabio MASSACCI, Dan Wallach, Nicola Zannone, 2010-01-25 It is our pleasure to welcome you to the proceedings of the Second International Symposium on Engineering Secure Software and Systems This unique event aimed at bringing together researchers from software engineering and security engineering which might help to unite and further develop the two communities in this and future editions The parallel technical sponsorships from the ACM SIGSAC the ACM interest group in security and ACM SIGSOFT the ACM interest group in software engineering is a clear sign of the importance of this interdisciplinary research area and its potential The difficulty of building secure software systems is no longer focused on mastering security technology such as cryptography or access control models Other important factors include the complexity

of modern networked software systems the unpredictability of practical development life cycles the intertwining of and trade off between functionality security and other qualities the difficulty of dealing with human factors and so forth Over the last years an entire research domain has been building up around these problems The conference program included two major keynotes from Any Gordon Microsoft Research Cambridge on the practical verification of security protocols implementation and Angela Sasse University College London on security usability and an interesting blend of research industry and idea papers
