ICT Solutions for Improving Smart Communities in Asia Jhanjhi, Noor Zaman, Rafique, Khalid, Ponnusamy, Vasaki, 2021-01-15 It is also essential to study the success of technology use in some of the advanced nations in the Asian region that promote a smarter and well advanced community A smarter community in these regions can only be materialized by adopting the latest trends in technology to improve quality of life Some of these regions need a great emphasis on technology adoption for women empowerment and safety promoting better health with telemedicine facilities environment and disaster prevention with IoT technologies water treatment and sanitation and addressing food scarcity issues with smarter precision agriculture Ultimately there needs to be more research focused on a smarter and secured community in the Asian region in terms of cultural and socioeconomic factors and technology advancements ICT Solutions for Improving Smart Communities in Asia explores new possibilities using digital solutions and technologies to create collaborative and smarter communities for advancement in agriculture the health sector education centers human resources and administrative domains as well as other areas to improve the overall living standards of people at the community level This book will cover two main areas the need for technology development in developing nations mainly focusing on Asia and the adoption of some of the advanced regions in Asia as role models for the less developed SAARC regions explicitly This book is ideally intended for researchers academicians IT specialists regional developers government officials practitioners academicians and students *Advances in Software Maintenance Management: Technologies and Solutions* Piattini, Mario, Polo, Macario, Ruiz, Francisco, 2002-07-01 *Advances in Software Maintenance Management Technologies and Solutions* is a compilation of chapters from some of the best researchers and practitioners in the area of software maintenance The chapters in this book are intended to be useful to a wide audience where software maintenance is a mandatory matter for study **Road Traffic Analysis, Theoretical Approaches and Practical Solutions** Elżbieta Macioszek, Irena

Jurdana, Grzegorz Sierpiński, 2024-01-10 This book presents many valuable tips for making decisions related to road traffic in transport networks. The knowledge base in practical examples as well as the decision support systems described in this volume finds interest among people who face the daily challenge of searching for advanced solutions and practical applications in road traffic engineering. The publication is therefore addressed to local authorities related to the planning and development of development strategies for selected areas with regard to transport both in the urban and regional dimension and to representatives of business and industry as people directly involved in the implementation of traffic engineering solutions. The tips contained in individual sections of the publication allow to look at a given problem in an advanced way and facilitate the selection of the appropriate strategy among others in relation to the heuristic approach to assessing the performance efficiency of road intersections in urban environments from the resilience perspective, modeling the distribution of transport pollutants in a naturally ventilated road tunnel, development of a camera based parking monitoring system with an automatic parking spot identification. In turn, due to a new approach to theoretical models including inter alia problems with the safety of passengers at tram stops or energy efficient radio platforms for the implementation of nodes of sensor networks, the publication also interests scientists and researchers carrying out research in this area. The publication entitled *Road Traffic Analysis: Theoretical Approaches and Practical Solutions* contains selected papers submitted to and presented at the 19th Transport Systems Theory and Practice Scientific and Technical Conference organized by the Department of Transport Systems, Traffic Engineering and Logistics at the Faculty of Transport and Aviation Engineering at the Silesian University of Technology. The conference took place on September 18-19, 2023 in Katowice, Poland. **Structural**

Engineering, Mechanics and Computation A. Zingoni, 2001-03-16 Following on from the International Conference on Structural Engineering, Mechanics and Computation held in Cape Town in April 2001, this book contains the Proceedings in two volumes. There are over 170 papers written by Authors from around 40 countries worldwide. The contributions include 6 Keynote Papers and 12 Special Invited Papers. In line with the aims of the SEMC 2001 International Conference and as may be seen from the List of Contents, the papers cover a wide range of topics under a variety of themes. There is a healthy balance between papers of a theoretical nature concerned with various aspects of structural mechanics and computational issues and those of a more practical nature addressing issues of design, safety and construction. As the contributions in these Proceedings show, new and more efficient methods of structural analysis and numerical computation are being explored all the time while exciting structural materials such as glass have recently come onto the scene. Research interest in the repair and rehabilitation of existing infrastructure continues to grow particularly in Europe and North America while the challenges to protect human life and property against the effects of fire, earthquakes and other hazards are being addressed through the development of more appropriate design methods for buildings, bridges and other engineering structures. *Energy*

and academics from countries such as USA Canada Germany India Australia Spain Italy Japan Slovenia Malaysia Mexico etc This book covers many important aspects of energy management forecasting optimization methods and their applications in selected industrial residential generation system This book also captures important aspects of smart grid and photovoltaic system Some of the key features of books are as follows Energy management methodology in industrial plant with a case study Online energy system optimization modelling Energy optimization case study Energy demand analysis and forecast Energy management in intelligent buildings PV array energy yield case study of Slovenia Optimal design of cooling water systems Supercapacitor design methodology for transportation Locomotive tractive energy resources management Smart grid and dynamic power management

Did Muhammad Exist? Robert Spencer, 2021-07-13 Is there any sound historical evidence that the prophet of Islam actually existed or is the entire story of Muhammad fable or fiction It is a question that few have thought or dared to ask Virtually everyone Muslim and non Muslim alike takes for granted that the prophet of Islam lived as a prophet as well as a political and military leader in seventh century Arabia But this widely accepted story begins to crumble on close examination In his blockbuster New York Times bestseller The Truth about Muhammad historian and Islam expert Robert Spencer revealed the often shocking contents of Islamic teachings about Muhammad Now in this newly revised and expanded version of Did Muhammad Exist he lays bare those teachings surprisingly shaky historical foundations This updated and enlarged version of this acclaimed book examines even more striking and compelling evidence that the story of Muhammad who for so long was assumed to have lived in the full light of history could be more myth and legend than historical fact Spencer meticulously examines historical records and archaeological findings pioneering new scholarship to reconstruct what we can know about Muhammad the Qur'an and the early days of Islam The evidence he presents challenges the most fundamental assumptions about Islam's origins
