Environmental Organic Chemistry Richard A. Larson, 2018-04-27 Reaction Mechanisms in Environmental Organic Chemistry classifies and organizes the reactions of environmentally important organic compounds using concepts and data drawn from traditional mechanistic and physical organic chemistry. It will help readers understand these reactions and their importance for the environmental fates of organic compounds of many types. The book has a molecular and mechanistic emphasis and it is organized by reaction type. Organic molecules and their fates are examined in an ecosystem context. Their reactions are discussed in terms that organic chemists would use. The book will benefit organic chemists, environmental engineers, water treatment professionals, hazardous waste specialists, and biologists. Although conceived as a comprehensive monograph, the book could also be used as a text or reference for environmental chemistry classes at the undergraduate or graduate level.

Soil and Groundwater Pollution Alexander J.B. Zehnder, 2013-04-17 SCOPE the Scientific Committee on Problems of the Environment was established by the International Council of Scientific Unions (ICSU) in 1969 as an international non-governmental non-profit organisation with the mandate to advance knowledge of the influence of humans on their environment as well as the effects of these environmental changes upon people, their health, and their welfare, with particular attention to those influences and effects which are either global or shared by several nations to serve as a non-governmental interdisciplinary and international council of scientists and as a source of advice for the benefit of governments and intergovernmental and non-governmental bodies with respect to environmental problems. SCOPE has been established because critical environmental concerns call for a thorough evaluation of the issues at stake, an assessment of their consequences at global and regional levels, and the formulation of possible solutions. Through its activities, SCOPE identifies available knowledge, then synthesizing it to point out where gaps and uncertainties exist and to recommend where efforts should be concentrated to develop explanations and solutions.

Workshop on Monitoring Oxidation-Reduction Processes for Ground-water Restoration, 2002 *Inland Flood Hazards* Ellen E. Wohl, 2000-07-03 This edited volume was originally published in 2000 and presents a comprehensive interdisciplinary review of issues related to inland flood hazards. It addresses physical controls on flooding, flood processes and effects, and responses to flooding from the perspective of human aquatic and riparian communities. Individual chapter authors are recognized experts in their fields who draw on examples and case studies of inland flood hazards from around the world. This volume is unusual among treatments of flood hazards in that it addresses how the non-occurrence of floods in association with flow regulation and other human manipulation of river systems may create hazards for aquatic and riparian communities. This book will be a valuable resource for everyone associated with inland flood hazards: professionals in government and industry and researchers and graduate students in civil engineering, geography, geology, hydrology, hydraulics, and ecology.

Cation Binding by Humic Substances Edward Tipping, 2002-05-30 Humic substances are highly abundant organic compounds formed in soils and sediments by the decay of dead plants, microbes, and animals. This book focuses on the important binding properties of these compounds which

regulate the chemical reactivity and bioavailability of hydrogen and metal ions in the natural environment Topics covered include the physico chemical properties of humic matter and interactions of protons and metal cations with weak acids and macromolecules Experimental laboratory methods are also discussed together with mathematical modelling Finally the author looks at how the results of this research can be used to interpret environmental phenomena in soils waters and sediments This comprehensive account of cation binding by humic matter is a valuable resource for advanced undergraduate and graduate students environmental scientists ecologists and geochemists

Hazardous Chemicals Associated with Plastics in the Marine Environment Hideshige Takada, Hrisi K.
