Kim,D.S. Reiner,Don Batory,2012-12-06 This book is an anthology of the results of research and development in database query processing during the past decade The relational model of data provided tremendous impetus for research into query processing Since a relational query does not specify access paths to the stored data the database management system DBMS must provide an intelligent query processing subsystem which will evaluate a number of potentially efficient strategies for processing the query and select the one that optimizes a given performance measure The degree of sophistication of this subsystem often called the optimizer critically affects the performance of the DBMS Research into query processing thus started has taken off in several directions during the past decade The emergence of research into distributed databases has enormously complicated the tasks of the optimizer In a distributed environment the database may be partitioned into horizontal or vertical fragments of relations Replicas of the fragments may be stored in different sites of a network and even migrate to other sites The measure of performance of a query in a distributed system must include the communication cost between sites To minimize communication costs for queries involving multiple relations across multiple sites optimizers may also have to consider semi join techniques **Database and Expert Systems Applications** Dimitris Karagiannis,1994-08-24 This volume constitutes the proceedings of the 5th International Conference on Database and Expert Systems Applications DEXA 94 held in Athens Greece in September 1994 The 78 papers presented were selected from more than 300 submissions and give a comprehensive view of advanced applications of databases and expert systems Among the topics covered are object oriented temporal active geographical hypermedia and distributed databases data management cooperative office applications object oriented modelling industrial applications conceptual modelling legal systems evolving environments knowledge engineering information retrieval advanced querying medical systems and CIM *Database Systems* Thomas M.
