Subject Guide to Australian Business, Commerce & Law Books John E. Simkin, 1992 A guide to the 5490 books in these fields in the Australian Books in Print database as at June 1992 and out of print titles notified since December 1989 with titles indexed under 3617 subject headings **Australian National Bibliography: 1992** National Library of Australia, 1988 APAIS 1999: Australian public affairs information service , Securities Regulation in Australia and New Zealand Gordon R. Walker, Brent Fisse, 1994 The regulation of securities markets is a survival issue for island nations such as Australia and New Zealand which require foreign investment for economic growth This timely book covers all aspects of securities regulation from the physical markets and the operation of the Stock Exchanges to the workings of the Securities Commissions It should be of interest to legal practitioners accountants and persons involved in finance Double Accounting for Goodwill Martin Bloom, 2013-05-13 Goodwill sometimes purchased but often more significantly internally generated is the major constituent of the value of many listed companies Accounting aims to provide users of financial statements with useful information and more than fifty current International Financial Reporting Standards prescribe

accounting disclosure requirements in minute detail However these Standards dismiss internally generated goodwill with a single brief provision that it is not to be brought to account at all The impairment regime now laid down for dealing with purchased goodwill contains severe flaws while previous methods have also been found to be unsatisfactory This book traces the history of the goodwill accounting controversy in detail and demonstrates that it has been a prime example of an issue conceived in a way that it is in principle unsolvable It explores the problem of recognising the importance of goodwill as a whole and finding a way of presenting meaningful information regarding it in the context of the financial statements The author's proposed solution builds upon research undertaken and uses a Market Capitalization Statement based on a modification of nineteenth century double accounting in a modern context Examples show that the proposed Market Capitalization Statement has the potential to provide significant information not currently available from conventional financial statements which in turn are freed to present clearer information
