Machiavelli's Romans Patrick J. Coby,1999-05-13 Although Machiavelli is usually considered a pioneer among modern political philosophers he read deeply in and was greatly influenced by the works of classical Roman thinkers such as Livy There is thus a fundamental tension between the modern and the ancient within Machiavelli s philosophy he is both a precursor to the Enlightenment and a throwback to republican Rome This is the main thesis behind Patrick Coby s innovative study of the neglected Machiavellian classic Discourses on Livy Coby argues that scholars have been too quick to dismiss the ancient antecedents of Machiavelli s thought particularly with regard to the modes and orders of the Roman republic The book seeks to resolve the central paradox of the Discourses that Machiavelli recommends adoption of Roman modes and orders even though those modes and orders destroyed the virt the strength which Machiavelli would have moderns resuscitate by imitating Rome A sophisticated highly engaging book Machiavelli s Romans will be of special interest to political theorists Renaissance scholars and classicists

Global Elite Migrations Irina Isaakyan,2024-09-23 This open access book explores the lives and careers of migrating artists with the purpose to understand how they make use of their migrant networks and how this process interacts with decisions they make about immigration and career development Situated at the crossroads of Migration Studies and Elite Studies this interdisciplinary research is based on sixty interpretive biographic interviews with opera singers from the former Soviet bloc who work in various places across Europe and beyond The book raises the question to what extent they exercise agency as migrants and professionals and to what extent they preserve their professional elitism on the transnational level The case of these migrant artists serves to illuminate the dynamics of a wider phenomenon global elite migrations which is compared with an intergalactic journey Through this sociological metaphor the book offers a new analytical framework to think about the agency network nexus [British Drama](#)

Progress or Collapse Roberto De Vogli,2013-01-03 Human progress is heading toward collapse There are converging ecological crises looming on the horizon climate change peak oil water shortages fish depletion and food scarcities The world is on a collision course against the limits of the ecosystem Modern societies are consuming polluting and growing as if there is no tomorrow Indeed there may not be one In Progress or Collapse Roberto De Vogli guides us through the multiple converging global crises of economic progress He explores the connections between the environmental crisis and the psychological social cultural political and economic

emergencies affecting modern societies It is not a coincidence the author argues that global ecological destruction is occurring in tandem with other crises rising mental disorders mindless consumerism rampant conformism status competition civic disengagement startling social inequalities global financial instability and widespread political impasse In this hard hitting analysis Roberto De Vogli identifies the root cause of all these symptoms of societal breakdown neoliberalism defined as market greed He argues that in recent decades modern societies have been dominated by a suicidal economic doctrine based on two articles of faith the greed creed and the market God The greed creed states that people are nothing but selfish profiteers in a perpetual search for status and wealth The market God is the belief that all societal and human affairs are best regulated as market exchanges What is to be done Can we stop progress toward collapse Given the current distribution of power and wealth and the state of psychological and political inertia in which we are trapped our chances of redefining progress around alternative values and embracing a new philosophy of life are slim Yet the history of human emancipation has often been shaped by giant leaps forward In the past civic struggles have overcome the limits of the possible Whether this will happen again in the future is the central question of our time This book will be of interest to researchers and students of ecology psychology public health epidemiology human development political philosophy economics sociology and politics
