The Internationalization Of Japan:

The Internationalization of Japan Glenn D. Hook, Michael Weiner, 2013-03-07 The Internationalization of Japan provides the English speaking reader with the opportunity to hear what some of Japan's leading social scientists and other commentators have to say about the internationalization of their country as well as their country's impact overseas. The topic is of extreme importance now as the international community demands a greater Japanese contribution to international society as well as changes in Japan to facilitate foreign access. The book discusses the internationalization of politics, economy and society. Topics of special interest include the internationalization of Japanese capital, the response of Japanese society to foreign workers, local level initiatives for internationalization and the internationalization of education. To place the internationalization of Japan in comparative perspective, there are chapters on Britain and the United States from a leading British and a leading American political scientist respectively. These two and the editors aside, all the contributors are highly regarded Japanese scholars or commentators. *The Internationalization Of Japanese Business* Malcolm Trevor, 2019-07-16 This book examines the progress of internationalisation of European and Japanese business in four different fields: the commodities and service trade, capital transfers, enterprise management and information and culture. The Internationalization of the Japanese Economy Chikara Higashi, Peter G. Lauter, 2012-12-06 In the first 1987 edition of this book, Dr Higashi and Dr Lauter have discussed and analyzed the initial stages of the internationalization process. The authors, with Michio Watanabe, at a reception in Hakone, Japan, 1988. xvi THE INTERNATIONALIZATION OF THE JAPANESE ECONOMY of the Japanese economy as it had evolved between 1985 and 1986. In this second edition, they explore the developments during 1985-1988 and show how the gradual transformation of the economy from export-led to domestic demand-led growth has taken place, what the results of the transformation process are, what remaining problems still have to be resolved and what directions the Japanese economy might take in the future. While the transformation process is by no means completed, Drs Higashi and Lauter provide a broad policy analysis based overview that enables the reader to understand not only the economic but also the basic political and social issues involved in the internationalization process. In this sense, the authors stay away from the extreme positions that characterize so many of the publications on Japan today and attempt to provide a realistic view of the changes and the impact of these changes. I believe that this book is a fair and balanced representation of events. **Internationalization within Higher Education** Elizabeth Stigger, Marian Wang, David Laurence, Anna Bordilovskaya, 2018-03-13 This book discusses what internationalization practices are and the different ways that they are being implemented by higher education institutions in Japan from a bottom-up perspective. It reflects the current situation faced by many Japanese universities in the context of the changing landscape in higher education and considerations in implementing changes to course curricula, programs and university admissions with regard to internationalization. The four case studies presented provide readers with clear examples of how the internationalization of

higher education institutions is developing within the Japanese higher education system and the issues that different higher education institutions face in this process *The Internationalization of Japanese Business* Malcolm Trevor,2019-09-27 This book examines the progress of internationalisation of European and Japanese business in four different fields the commodities and service trade capital transfers enterprise management and information and culture *The Internationalization of Japan in Historical Perspective* Ryhuhei Hatsuse,1990 *The Internationalization Of Japanese Business* Malcolm Trevor,2019-07-16 This book examines the progress of internationalisation of European and Japanese business in four different fields the commodities and service trade capital transfers enterprise management and information and culture *The Internationalization of Japan's Security Policy* Michael G. During the rapid growth period of the Japanese economy from the mid 1950s to the mid 1970s the economic system that became entrenched in Japan the so called Japanese style capitalism was based on the government business bureaucracy triad Although its distinct features survived the subsequent two decades of slow growth there are many indications that the Japanese economy is once again struggling to transform itself These translations from the Japanese economic literature expertly address this transformation *Japan's Managed Globalization* Ulrike Schaede,William W. Grimes,2015-03-27 As Japan moves from a catch up strategy to a post developmental stage it is changing its actions and reactions both in terms of international political economy and domestic policy issues The current changes in Japan can best be understood as following a path toward permeable insulation Japan's government and economic system continue to insulate domestic businesses from full competition and the rigor of market forces but this insulation is also permeable because a decline in state power vis à vis the private sector since the 1990s has combined with a decline in the solidarity of private institutions such as keiretsu or trade associations to make strategies of insulation much less rigid and uniform As a result of the permeable insulation Japan's response to the global and domestic challenges of the 1990s is neither one of full acceptance nor rejection of global standards and practices Instead the basic scheme is one of pragmatic utilization of new rules and circumstances to continue industrial policies of promotion or protection in a new post developmental era By bringing together in depth case studies of eight critical issue areas this book looks at Japan's responses to globalization and move toward permeable insulation Part 1 introduces the reader to the concept of permeable insulation and provides a detailed review of past practices and changes in policy Part 2 deals with international trade issues Japan's compliance with and resistance to global trade rules and the domestic interests visible in Japan's compliance Part 3 focuses on domestic measures and policies that Japanese firms have used to adapt to the changes within Japan and abroad triggered by globalization and liberalization **Negotiating Identity In Contemporary Japan** Ching Lin Pang,2012-10-02 First published in 2000 This book aims to study the shifting identity of Japanese returnees kikokushijo within a migrational context The core findings based on literature and fieldwork in Brussels and Japan
