The Ivory Billed Woodpecker James T Tanner:

Nature's Ghosts Mark V. Barrow, 2011-04-15 The rapid growth of the American environmental movement in recent decades obscures the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in Nature's Ghosts the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson's day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them Nature's Ghosts offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead

Ghost Birds Stephen Lyn Bales, 2010-10-21 Everyone who is interested in the ivory billed woodpecker will want to read this book from scientists who wish to examine the data from all the places Tanner explored to the average person who just wants to read a compelling story Tim Gallagher author of The Grail Bird The Rediscovery of the Ivory billed Woodpecker In 1935 naturalist James T Tanner was a twenty one year old graduate student when he saw his first ivory billed woodpecker one of America's student when he saw his first ivory billed woodpecker one of America's rarest birds in a remote swamp in northern Louisiana At the time he rarest birds in a remote swamp in northern Louisiana At the time he was part of an ambitious expedition traveling across the country to record and photograph as many avian species as possible a trip organized by Dr Arthur Allen founder of the famed Cornell Lab of Ornithology Two years later Tanner hit the road again this time by himself and in search of only one species that ever elusive ivory bill Sponsored by Cornell and the Audubon Society Jim Tanner's work would result in some of the most extensive field research ever conducted on the magnificent woodpecker Drawing on Tanner's personal journals and written with the cooperation of his widow Nancy *Ghost Birds* recounts in fascinating detail the scientist's dogged quest for

the ivory bill as he chased down leads in eight southern states With Stephen Lyn Bales as our guide we experience the same awe and excitement that Tanner felt when he returned to the Louisiana wetland he had visited earlier and was able to observe and document several of the ghost birds including a nestling that he handled banded and photographed at close range Investigating the ivory bill was particularly urgent because it was a fast vanishing species the victim of indiscriminant specimen hunting and widespread logging that was destroying its habitat As sightings became rarer and rarer in the decades following Tanner s remarkable research the bird was feared to have become extinct Since 2005 reports of sightings in Arkansas and Florida made headlines and have given new hope to ornithologists and bird lovers although extensive subsequent investigations have yet to produce definitive confirmation Before he died in 1991 Jim Tanner himself had come to believe that the majestic woodpeckers were probably gone forever but he remained hopeful that someone would prove him wrong This book fully captures Tanner s determined spirit as he tracked down what was then as now one of ornithology s true Holy Grails STEPHEN LYN BALES is a naturalist at the Ijams Nature Center in Knoxville Tennessee He is the author of *Natural Histories* published by UT Press in 2007 **Restoring North America's Birds** Robert A. Askins, 2008-10-01

Div The decline of bird species in a wide range of North American habitats forests prairies shrublands mountain regions marshes and deserts has inspired two decades of intense scientific study of bird ecology and conservation But for professional scientists and amateur birders alike interpreting the results of these diverse studies is often complex and bewildering This accessible book pulls together recent research on bird species and habitats to show how basic ecological principles apply in seemingly different situations Robert A Askins provides an engaging introduction to bird ecology and concepts of landscape ecology focusing on such intriguing species as Bachman s Warbler Red Crossbill Mountain Plover and Marbled Murrelet Understanding the ancient landscapes of North America and how humans have changed them Askins says is essential for devising plans to protect and restore bird populations In addition to such obvious changes to the landscape as the clearing of forests and plowing of prairies more subtle changes also dramatically affect birds Species may disappear when we interrupt natural disturbances by suppressing wildfires or trapping out beaver or when we disrupt habitat with roads and housing developments Askins challenges some of the assumptions that underlie current conservation efforts and offers concrete recommendations based on sound ecological principles for protecting the rich natural diversity of North America s birds *div* *Folklore and Zoology* Floe Foxon, 2024-09-03 A scientific excursion into folklore zoology and cryptozoology this text highlights a field often called a pseudoscience which seriously considers the possible existence of hidden or unknown animals not recognised in conventional zoology *Folklore and Zoology* accessibly reviews the science of DNA samples film and photograph analysis hair and footprint examination and the statistics behind such alleged animals as Sasquatch and the Yeti Nessie and Champ the Griffin and the Thunderbirds and the possible survival of the thylacine ivory billed woodpecker eastern cougar and others With over 400 references *Folklore and Zoology* is among the most complete
