

6. Two additional jurors are needed to complete a jury for a criminal trial. There are six prospective jurors, two women and four men. Two jurors are randomly selected from the six available.

- Define the experiment and describe one sample point. Assume that you need to describe only the two jurors chosen and not the order in which they were selected.
- List the sample space associated with this experiment
- What is the probability that both of the jurors selected are women. Check your answer using counting principles as well.
- What is the probability that atleast one of the juror is women. Check your answer using counting principles as well.
- What is the probability that atmost one of the juror is women. Check your answer using counting principles as well.
