Fairbanks, 2004 The terms recombinant DNA technology DNA cloning molecular cloning or gene cloning all refer to the same process the transfer of a DNA fragment of interest from one organism to a self replicating genetic element such as a bacterial plasmid The DNA of interest can then be propagated in a foreign host cell This technology has been around since the 1970s and it has become a common practice in molecular biology labs today Reproductive cloning is a technology used to generate an animal that has the same nuclear DNA as another currently or previously existing animal Dolly was created by reproductive cloning technology In a process called somatic cell nuclear transfer SCNT scientists transfer genetic material from the nucleus of a donor adult cell to an egg whose nucleus and thus its genetic material has been removed. The reconstructed egg containing the DNA from a donor cell must be treated with chemicals or electric current in order to stimulate cell division Once the cloned embryo reaches a suitable stage it is transferred to the uterus of a female host where it continues to develop until birth Therapeutic cloning also called embryo cloning is the production of human embryos for use in research The goal of this process is not to create cloned human beings but rather to harvest stem cells that can be used to study human development and to treat disease Stem cells are important to biomedical researchers because they can be used to generate virtually any type of specialised cell in the human body This new book presents an up to date Chronology of Cloning along with current and selected abstracts dealing with cloning as well as a guide to books on the topic Access to the abstract and books sections is provided by title subject and author indexes Second Act Danielle Steel, 2024-07-23 NEW YORK TIMES BESTSELLER In this gripping novel from Danielle Steel a top Hollywood executive seeks a new beginning when his career takes an unplanned turn As the head of a prestigious movie studio for nearly two decades Andy Westfield has had every conceivable professional luxury a stunning office on the forty fourth floor a loyal assistant who can all but read his mind access to a private jet and company cars The son of Hollywood royalty Andy always put his career before his marriage and now besides his daughter and young grandchildren it s the only thing he truly loves But then Andy s world is upended The studio is sold and the buyer's son demands the top seat Out of a job and humiliated Andy spirals When his head clears he decides to get as far away from Los Angeles as possible until the dust settles and he can find a new way forward Andy signs a six month rental agreement for a luxurious home in a tiny forgotten coastal town two hours from London When he arrives he hires a local woman to help get his affairs in order A former journalist Violet Smith is at a crossroads as well and this temporary job is exactly what she needs to tide her over But when Violet leaves the manuscript of her unfinished novel behind after work one day Andy lets his curiosity get the best of him and is captivated by a story that begs to be adapted for the big screen Could

Message from Nam Danielle Steel,2009-12-01 How do you tell someone what it s like to kill a man hand to hand run a bayonet through his guts or shoot a sniper in the face who turns out to be a woman How do you explain the nine year old boy who throws a grenade and kills your best friend How do you tell them what it s like Or about the sunsets on the mountains or the green of Viet Nam or the sounds and the smells and the people and the girl who can t even say your name but you know you love her There was nothing any of them could say So most of them rode home in silence For seven years Paxton Andrews would write an acclaimed newspaper column for Americans from the front before finally returning to the States and then attending the Paris peace talks But for her and for the men who fought in Viet Nam life would never be the same again
