Corporate fraud. Falsified records at Veterans Administration hospitals. Teachers pressured to feed test answers to students. These scandals could have been prevented if early on people had said no to their higher ups. Ira Chaleff discusses when and how to disobey inappropriate orders, reduce unacceptable risk, and find better ways to achieve legitimate goals. He delves into the psychological dynamics of obedience, drawing in particular on what Stanley Milgram's seminal Yale experiments in which volunteers were induced to administer shocks to innocent people teach us about how to reduce compliance with harmful orders. Using vivid examples of historical events and everyday situations, he offers advice on judging whether intelligent disobedience is called for, how to express opposition, and how to create a culture where citizens are educated and encouraged to think about whether orders make sense.
