Notes and Queries ,1869 **Harvard University Bulletin** ,1887 *The Southern California Practitioner* ,1892 *The British Veterinary Journal* ,1879 *Bibliotheca Britannica; Or, A General Index to British and Foreign Literature* Robert Watt,1824 **A Descriptive Catalogue of the Etched Work of Wenceslaus Hollar 1607-1677** Richard Pennington,2002-07-25 A catalogue of over 2 700 etchings which form an important pictorial chronicle of seventeenth century England *Publish and Perish: The Practice of Censorship in the British Isles in the Early Modern Period* Isabelle Fernandes,2020-10-06 The development of printing practices during Tudor rule led both to the dissemination of religious and secular knowledge and the development of a legal arsenal to control it While the vast majority of studies on censorship regard it as being at the origin of the notion of authorship critics tend to disagree on its actual influence on early modern writings Who among the Church and the secular state were its main supporters Did it aim at destroying or removing punishing or protecting hampering or regulating Did it propagate a culture of secrecy or on the contrary did it help to circulate new ideas and knowledge by controlling them and making them more acceptable to the masses If the answers to these questions are bound to differ according to the aesthetic and religious biases of both censors and censored they all lead to one major point of debate did censorship really work to stop some marginal threat or did it simply improve the lot of early modern writers who turned its limited negative effects into a comforting shield of self publicity By suggesting it suppressed neither artistic creativity nor subversive practices this volume analyses censorship in Britain and Ireland during the Tudor and Stuart periods as an instrument of regulation rather than a repressive tool Ideal for both graduate students and general readers interested in Early Modern History the work sheds new light on a topic as fascinating as it is often misunderstood

"*Better in France?*" Frédéric Ogée,2005 This book discusses the way ideas and forms traveled between Britain and France during the eighteenth century and the extent to which the circulation of ideas between the two countries could be difficult The volume shows that this difficulty because it was acknowledged and often thematized contributed to an increased awareness of what was really at stake in the very concept of Enlightenment The examination of points of contact between the two cultures contacts that became very much the fashion in the course of the eighteenth century helps us understand how apparently common concepts and concerns fared differently from one country to the next while being enriched by those contacts The conversation of aesthetic theories and artistic forms of expression between the two countries sheds interesting light on the overall confrontation of conflicting theories of power and control that expressed themselves throughout the period of complete political redistribution The ways myths and stories forms and theories traveled and changed currency gives us a clearer political grasp on the whole history of exchanges as writers and artists encouraged or irritated by the new myth of Progress kept putting forward nothing else but models and strategies of public and private political economy Frederic Ogee is Professor of English Literature at the University of Paris 7 Denis Diderot **Spanish Explorations and Settlements in North America from the Fifteenth to the Seventeenth Century** ,1886 **A General Catalog of Books Offered to the Public at the Affixed Prices** Bernard Quaritch (Firm),1882 A General Catalogue of Books Offered to the Public at the Affixed Prices by Bernard Quaritch ... ,1882 **Medieval Monstrosity and the Female Body** Sarah Alison Miller,2010-07-02 The medieval monster is a slippery construct and its referents include a range of religious racial and corporeal aberrations In this study Miller argues that one incarnation of monstrosity in the Middle Ages the female body exists in special relation to medieval teratology insofar as it resists the customary marginalization that defined most other monstrous groups in the Middle Ages Though medieval maps located the monstrous races on the distant margins of the civilized world the monstrous female body took the form of mother sister wife and daughter It was therefore pervasive proximate and necessary on social sexual and reproductive grounds Miller considers several significant texts representing authoritative discourses on female monstrosity in the Middle Ages the Pseudo Ovidian poem *De vetula* The Old Woman a treatise on human generation erroneously attributed to Albert the Great *De secretis mulierum* On the Secrets of Women and

Julian of Norwich's Showings Through comparative analysis Miller grapples with the monster's semantic flexibility while simultaneously working towards a composite image of late medieval female monstrosity whose features are stable enough to define Whether this body is discursively constructed as an Ovidian body a medicalized body or a mystical body its corporeal boundaries fail to form properly it is a body out of bounds
