Leaving Anthony Stavrianakis, 2020-04-28 The first book length anthropological study of voluntary assisted dying in Switzerland Leaving is a narrative account of five people who ended their lives with assistance Stavrianakis places his observations of the judgment to end life in this way within a larger inquiry about how to approach and understand the practice of assisted suicide which he characterizes as operating in a political legal and medical parazone adjacent to medical care and expertise Frequently observers too rapidly integrate assisted suicide into moral positions that reflect sociological and psychological commonplaces about individual choice and its social determinants Leaving engages with core early twentieth century psychoanalytic and sociological texts arguing for a contemporary approach to the phenomenon of voluntary death seeking to learn from such conceptual repertoires as well as to acknowledge their limits Leaving concludes on the anthropological question of how to account for the ethics of assistance with suicide to grasp the actuality and composition of the ethical work that goes on in the configuration of a subject one who is making a judgment about dying with other participants and observers the anthropologist included

What Kind of Death Govert den Hartogh, 2022-10-31 Many books have been published about physician assisted death This book offers a comprehensive and in depth examination of that subject but it also extends the discussion to a broader range of end of life decisions including suicide palliative care and sedation until death In every jurisdiction that has laws permitting some kind of physician assisted death a central point of controversy is whether such assistance should only be available to dying patients or to everyone who wants to end his life The right to determine the manner and time of one s own death however does not necessarily mean that physicians should be permitted to cooperate in ensuring a quick and peaceful death In this book Govert den Hartogh considers the fundamental and practical matters including concrete issues of legal regulation related to end of life decision making He proposes a two tiered system Everyone should have access to humane means of ending his life if his decision to end it is voluntary well considered and durable But doctors should only participate in a joint action of ending the patient s life on his request if they also are convinced of acting in the patient s best interests in particular by ending intolerable and unrelievable suffering And perhaps there is reason to restrict that second service to dying patients The whole argument however depends on the extent to which in both tiers of the system we can design legal safeguards that will enable us to trust judgments about the requesting person s request and about his suffering The book considers much new evidence in

Over the past five years medical aid in dying also known as assisted suicide has expanded rapidly in the United States and is now legally available to one in five Americans This growing social and political movement heralds the possibility of a new era of choice in dying Yet very little is publicly known about how medical aid in dying laws affect ordinary citizens once they are put into practice Sociological studies of new health policies have repeatedly demonstrated that the realities often fall short of advocacy visions raising questions about how much choice and control aid in dying actually affords **Scripting Death**
