The Making Of Low Carbon Economies:

The Making of Low Carbon Economies Heather Lovell, 2014-12-17 The Making of Low Carbon Economies looks at how more than two decades of sustained effort at climate change mitigation has resulted in a variety of new practices rules and ways of doing things a period of active construction of low carbon economies From outer space observations of the carbon in tropical forests to carbon financial reporting and insulating solid masonry walls these diverse things activities and objects are integral to how climate change has been brought into being as a problem The book takes a fresh look at society's response to climate change by examining a diverse array of empirical sites where climate change is being made real through its incorporation into everyday lives a process of stitching climate concerns into the discourse and practices of already existing economies as well as creating new economies The Making of Low Carbon Economies adds fresh insights to economic sociology and science and technology studies scholarship on the multiple origins and heterogeneous operation of markets demonstrating the constraints and opportunities of an economic framing of the problem of climate change It covers the obvious and now well researched topic of carbon markets as well as new more unusual material on the low carbon reframing of already existing markets and economies

Building a Low-carbon Economy Great Britain. Committee on Climate Change, 2008 Climate change resulting from CO₂ and other greenhouse gas emissions poses a huge threat to human welfare To contain that threat the world needs to cut emissions by about 50 per cent by 2050 and to start cutting emissions now A global agreement to take action is vital A fair global deal will require the UK to cut emissions by at least 80 per cent below 1990 levels by 2050 In this report the Committee on Climate Change explains why the UK should aim for an 80 per cent reduction by 2050 and how that is attainable and then recommends the first three budgets that will define the path to 2022 But the path is attainable at manageable cost and following it is essential if the UK is to play its fair part in avoiding the far higher costs of harmful climate change Part 1 of the report addresses the 2050 target The 80 per cent target should apply to the sum of all sectors of the UK economy including international aviation and shipping The costs to the UK from this level of emissions reduction can be made affordable estimated at between 1.2 per cent of GDP in 2050 In part 2 the Committee sets out the first three carbon budgets covering the period 2008-22 and examines the feasible reductions possible in various sectors decarbonising the power sector energy use in buildings and industry reducing domestic transport emissions reducing emissions of non CO₂ greenhouse gases economy wide emissions reductions to meet budgets The third part of the report examines wider economic and social impacts from budgets including competitiveness fuel poverty security of supply and differences in circumstances between the regions of the UK

The Business Leader's Guide to the Low-carbon Economy Larry Reynolds, 2016-04-01 Rising energy prices and concerns about climate change are driving us towards a new kind of economy a low carbon economy What will this low carbon economy be like and what does your business have to do to prosper in this new business environment Larry Reynolds shows how successful organisations are already learning to be

more energy efficient manage their carbon footprint adapt to climate change and become truly sustainable As well as explaining how to future proof your organisation against possible threats The Business Leader s Guide to the Low carbon Economy tells you how to make the most of the many opportunities that the low carbon economy will bring especially in growing profits from new products and services It is your guide to creating an organisation that will thrive in the twenty first century While there are plenty of published books about going green there are none which explain the low carbon economy and how to thrive in it This book will fill that important gap Drawing on examples from across industries including businesses such as Asda BT Cargill Coca Cola Co operative Group Eurostar Marks and Spencer Tesco Tesla Walker s Crisps Walmart and ZipCar Larry Reynolds shows how today s successful organisations are already benefiting from the coming low carbon economy
