Christliche Ethik bei Schleiermacher - Christian Ethics according to Schleiermacher Hermann Peiter, 2010-04-09 No one is so intimately acquainted with Schleiermacher's Christian Ethics material or with the 1821/1822 first edition of his companion volume *Christian Faith* than Hermann Peiter. The present volume is a collection of Peiter's nineteen essays and thirty reviews. Extensive English summaries are offered for all this material and an English version for four of the essays. Professor Peiter's summary of this volume reads as follows: This book treats of praxis in the Christian life and of Christian responsibility for the world we have in common. The following however forms a background for these considerations: Schleiermacher reminds his Christian brethren who often deck themselves out with alien borrowed plumes from morals and metaphysics of their actual theme that of religion which he also designates as a kind or mode of faith. Like Luther he also turns against both the practical misconception that considers faith itself to be a good work and the theoretical misconception that faith is a product of thinking a theory. Whether a practitioner thinks to give thanks for one's own work or whether a theoretician hopes to find final fulfillment and justification in one's range of metaphysical ideas amounts to the same thing. Faith is the courage to be Paul Tillich. For Schleiermacher to want to have speculation thus metaphysics and praxis without religion is the nonsalutary intention of Prometheus who faintheartedly stole what he could have expected to possess in restful security. If taken seriously the gods to use that pagan expression for once are that nature to which a human being belongs. Each human being is their possession. When one steals what the gods have one steals oneself; can thank oneself for a robbery. For a gift that is stolen one cannot possibly be thankful. Only a pure gift awakens true joy. A human being has the chance to receive the gift that one is or is not in case it is stolen not from a thief but from religion. Thanks to one's birth both physical and spiritual one gains oneself and has oneself. To steal means to take away to depreciate. In contrast whoever has oneself from elsewhere is no longer extracted from oneself or from the one to whom one belongs.

Choice. This volume collects a series of lectures given by the renowned French thinker Michel Foucault. The first part

presents a talk *Parresia* delivered at the University of Grenoble in 1982 The second presents a series of lectures entitled *Discourse and Truth* given at the University of California Berkeley in 1983 which appears here for the first time in its full and correct form Together these lectures provide an unprecedented account of Foucault's reading of the Greek concept of *parresia* often translated as truth telling or frank speech The lectures trace the transformation of this concept across Greek Roman and early Christian thought from its origins in pre Socratic Greece to its role as a central element of the relationship between teacher and student In mapping the concept's history Foucault's concern is not to advocate for free speech rather his aim is to explore the moral and political position one must occupy in order to take the risk to speak truthfully These lectures carefully edited and including notes and introductory material to fully illuminate Foucault's insights are a major addition to Foucault's English language corpus

Telling to Understand Andrea Smorti, 2020-06-23 This book illustrates the link that unites memory thought and narration and explores how the act of telling helps people to understand themselves and others The structure of the book is divided into two parts The first part focuses on the aspect of narrative comprehension the person as narrator It identifies two different origins of narrative comprehension memory and play and argues that the narratives we produce starting from autobiographical memory are intended to give order and meaning to events that happened in the past in order to be able to interpret the present Conversely the narratives we produce starting from play are aesthetically constructed not forced to respect reality and because of this create potential new worlds of understanding The second part of this book is devoted to the study of narrative understanding as an understanding of the other Chapters examine the different points of view a listener can adopt in order to interpret the text produced by a narrator and how these points of view can interact with each other The book concludes with a consideration of narrative comprehension in the digital world and examines the principal effects of stories and narrative on the notion of self in the realm of the Internet galaxy *Telling to Understand* will be of interest to researchers and students in cognitive science psychology literary studies philosophy education and educational technology as well as any reader interested in enlarging their concept of narrative and how narrating modifies the self
