## **The Lost Planet The Lost Planet Series:**

*The Lost Planet* AQEEL AHMED, 2024-02-25 To sum up In this epic story of exploration and adventure a group of brave astronauts are sent on a journey unlike any other they need to find the Lost Planet a strange place that only shows up once every hundred years This story takes us on an exciting trip through space where there are endless things to discover and the unknown is waiting to be explored The astronauts are driven by their desire to learn and their determination and they carefully plan their trip They get ready for the challenges ahead by checking every system on their spaceship getting the goods they need and looking at star maps As soon as they leave Earth they start a wonderful trip into space full of adventure and chances to find new things The astronauts have to deal with many issues on their journey through space For example they have to get through a dangerous space storm that tests their teamwork and determination and they also have to figure out the hints hidden in a strange chart that will help them get closer to their goal When they meet nice aliens who give them useful information about the Lost Planet it makes them even more determined to succeed A huge field of asteroids that they can only cross with all of their skill and smarts is the hardest thing they have to do The astronauts are confused and downcast because the Lost Planet disappears just as they are about to get close to it Not scared they do what their alien friends tell them to do and find a secret key hidden inside their spaceship This key holds the key to finding the Lost Planet even though it can't be seen When the Lost Planet finally shows up it's even more amazing and full of wonders than anyone could have dreamed The secret key can be used to open it The astronauts are amazed by everything they see as they travel through the bright scenery and meet strange and beautiful animals After successfully completing their task they return home full of new information and interesting stories to share with everyone around the world The story of Lost Planet is more than just a journey it shows how strong people can be how well they can work together and how much they love exploring The mission of the astronauts shows that we can solve any problem and find out about the wonders of the universe if we are curious and work together The Lost Planet used to be just a story but now it stands for what can happen when we're brave enough to go into the unknown with each other Chapter 1 The Great Mission A wonderful trip through a universe full of secrets and wonders was about to start There was nothing ordinary about this trip it was a fantastic mission that interested everyone from the tiniest child to the oldest adult Astronauts who are brave and interested were picked for a trip unlike any other They had to find and study a strange world that was only known as the Lost Planet This planet was different from all the others it was a jewel in the universe that only showed itself once every thousand years It was time for it to show up Stories about the Lost Planet were full of wonder and mystery Legends talk about its amazing beauty hidden mysteries and huge promise People said it was a place where the stars sang and the sky danced in strange colors There were many hopes and goals for the astronauts but they were more than just explorers They were chosen to connect what was known and what was unknown Their goal was to find this mysterious planet figure out what it was all about and come back with information

that could change the course of history As they got ready for their trip the astronauts were clearly very excited They called on their bravery interest and desire to try new things They carefully checked their spaceship to make sure that all of its systems worked and that all of its bolts were tight They brought tools and equipment to help them study on the Lost Planet along with things they would need to stay alive Under the calm light maps of the stars were spread out and looked at showing how they moved through space But there was more to this task than just looking around It showed how deeply their culture valued the quest for new knowledge It reminded me that there were secrets all around me waiting to be solved and that I needed to be brave and interested to find them The astronauts knew there were risks the trip would be hard and take a long time and anything could happen in space They just couldn't stay away from the draw of finding the Lost Planet and its secrets Everyone in the world was waiting with bated breath for the day of departure They said goodbye to Earth with a wave from their sleek and sturdy spaceship With a roar that made everyone happy the rocket took off leaving a path of hope and fire behind it A new era in the history of their world starts with the start of the trip to the Lost Planet This chapter is full of the desire to explore the thrill of adventure and the strong bond of friendship The universe was ready to share its ancient secrets with anyone who was brave enough to look for them and the journey had started Chapter 2 Getting Ready for the Trip As the huge search for the Lost Planet began the astronauts promised to carefully prepare They knew that their trip through the vastness of space would take not only bravery but also careful planning and organization Each person on the team had a specific job to do and they all fit together like jigsaw puzzle parts making the whole picture better Because they respected each other and worked together their plans were a symphony of hard work and dedication The spaceship which would be their home and guardian in the unknown parts of space was the most important thing to them They looked at every part of it from the strong engines that would take them into space to the systems that would keep them alive so they could breathe eat and sleep while they were millions of kilometers from Earth They tried the technology for communication to make sure they could stay in touch with their home base tell people about what they were finding and get helpful advice It became clear to the astronauts that their spaceship was more than just a way to get from one place to another it was a reliable travel companion It was like putting together a difficult puzzle when I was packing supplies They needed healthy food that would last a long time clean water that could be used again and again and medical goods in case they needed them suddenly Of course they also brought tools for fixing the spaceship and exploring the Lost Planet Each item was carefully chosen and checked to make sure that nothing important was taking up valuable room and nothing unnecessary was left behind Studying star maps was probably the most exciting thing they did to get ready They used these plans to find their way through the universe which is a huge and mysterious place They talked a lot about the path they were going to take to get to the Lost Planet The constellations and other celestial bodies shown on the maps which were similar to those used by ancient sailors to find their way around the world helped them on their trip This wasn't just about finding out where they were in the world it

was also about getting a sense of how big the journey they were about to take was The astronauts became closer as they worked because they all wanted to reach the same goal and were excited about the trip that was coming up What they hoped to find on the Lost Planet was something they talked about Their drive spread to everyone who was trying not just their group It was clear that this trip wasn't just a quest it was a journey into the unknown that showed how the human spirit needs to explore and understand With each day of planning they became more ready Everything was carefully packed the spaceship was ready to go and they had mental maps of the universe They stood together because they had the same goal They were not just explorers they were leaders on the verge of making a finding that could change history They were ready for the most exciting trip of their lives Chapter 3 The Take Off On the day of the launch everyone was looking forward to and excited about it It was an event that everyone who saw would remember After getting everything ready the astronauts got on their spaceships their hearts racing with excitement for the exciting trip they were about to go on They said goodbye to their family friends and the commonly seen things on Earth They were now ready to face the unknown As they buckled up and double checked their gear they looked at each other with hope and made a promise to stick together no matter what Then the moment they had all been waiting for came The countdown started and it could be heard all over the launch site There was a chorus of excitement building up to the end Three two one set off the spaceship's engines which shot the astronauts through the atmosphere and into the sky with a huge roar The earth shook as the sound of the rocket smashing through the air It was an amazing show of how brave and creative people can be when they start a historic trip As the rocket rose higher Earth turned into a beautiful whirling ball of blue green and white light The pretty sky gave way to the blackness of space and there was a big area where the sun shone like a star far away The pilots felt like they were flying without wings once they were no longer affected by gravity It was an exciting feeling that they were weightless As they looked out the windows they were amazed because few people had ever seen Earth from space It served as a reminder of how big and strange the world still was as well as how small and linked everything was They could see the vastness of space in front of them It looked like a clean canvas with many stars galaxies and planets shining on it They could never have imagined a world with so many amazing options It was beyond beautiful It was clear to the astronauts that they were part of a huge exploration that pushed the limits of human knowledge and desire They also saw this amazing scene In search of the Lost Planet which had caught many people's attention they were going into unexplored territory

The Lost Planet Series Nicole Blanchard, K Webster, 2019-12 Journey to The Lost Planet with five full length novels The Forgotten Commander Our planet Mortuus is lost and dying A desolate place where a few lone survivors dwell My men have lost hope Our future is bleak Longevity is a luxury we can't afford The most we can hope for is survival We've all but given up when an opportunity presents itself Five females a chance at a future Procuring these women went against everything I'd been taught but desperate times call for desperate measures They're ours now Asleep and made ready for breeding We won't die out lost and forgotten It's our destiny to grow

and once again inhabit our lonely planet I am Breccan Aloisius the forgotten commander My people will have the future they deserve I ll make sure of it My mind is made up until she wakes and nothing goes as planned The Vanished SpecialistMy lilapetal is dying and I can t save her The woman who brought me back to life may not live long enough to see me truly happy All the tests the experiments have failed me and I have failed her If I don t devise a cure to save my alien I ll spend the rest of my existence on Mortuus alone The others believe my mate isn t strong enough to survive That she can t breed and should be put back into cryosleep until she s healed But I won t allow it I will defy the only family I ve ever known to save her Even if it means vanishing into the unknown She is all that matters and no amount of her protests will keep me from doing what I must to keep her safe The Mad LieutenantHer voice brought me back from the darkness but I don t want the sweet relief she promises Unlike the rest of the morts on my planet I don t want a mate Especially not her She s loud boisterous and doesn t take no for an answer Unlike the rest of the alien females my brothers have woken from cryosleep Molly doesn t find my growls intimidating The more I try to ignore her the more she tries to befriend me I d been taken captive once by the virus that nearly killed me I bear its scars not only on my body but in my thoughts No woman not even one as beautiful as Molly can heal me I don t want her but she needs me The Uncertain ScientistI had everything I ever wanted I was brilliant successful esteemed Alone But I didn t mind I liked being alone Until they stole me And I wake up captive pregnant with an alien baby and still a virgin For a race of freaks nearing extinction there seems to be far far too many of them Everywhere I turn one of the morts or their human mates wants to comfort me make me feel welcome and safe But I don t want to feel welcome or safe I want the life they stole from me None of them pay any heed to my angry tirades least of all the father of the child I carry There s no doubt he wants the baby but that isn t all he wants In fact I m beginning to think if some of the morts had their way I d never be alone again The Lonely OrphanOur planet has hope Still decaying and barely inhabitable but ours With the arrival of the females we re no longer lonely Well some of us aren t For the rest we ache for what they have Peace Happiness Love But where the other unmatched Morts want a mate to call their own I m different Life cruelly made me fall for the one person I m not allowed to have Bitterness and jealousy are my mates now I ve resigned myself to the fact that I will always be alone Until my commander sends me on a mission to rescue someone very important to his mate her sister A woman so different So imperfect So maddeningly defiant Someone I have no interest in whatsoever This feral female will never own my heart Or so I thought Love always has a plan of its own
