The Internet and Social Inequalities , **The Internet and Social Inequalities** James C. Witte, Susan E. Mannon, 2010

Social Statistics Thomas J. Linneman, 2021-12-30 With a clear engaging writing style and fascinating examples using a variety of real data this text covers the contemporary statistical techniques that students will

encounter in the world of social research. It covers these techniques at an introductory level and carefully guides students through increasingly complex examples without intimidating them. Recurrent examples using four timely topics—health, immigration, income inequality, and everyday harassment—help students understand how the techniques fit together and how to use the techniques in combination with one another. A superb author-created web resource accompanies the text. How to make clear presentations of research results is also a feature of the text. New to this edition: New research shows how the techniques have changed over time in the academic literature, showing students that social scientists really do use the statistical techniques the book teaches and giving them ample motivation to learn the techniques. Examples throughout the book use the most recent data from the General Social Survey. Four timely topics are threaded throughout the book: immigration, health, income inequality, and everyday harassment. Linneman uses these topics recurrently with different statistical techniques to illustrate how the techniques are related to one another. The new edition more explicitly emphasizes that the various techniques the students are learning are often used in combination with one another. After introducing a new technique and showing how to use it on its own, Linneman then systematically offers examples of how to combine that technique with techniques students learned in previous chapters. Most of the literature examples that end each chapter are new and use very recent research from top academic journals: three quarters from 2015 or later, nearly half from 2019. They feature research that covers timely topics such as Black Lives Matter, transgender health, social media, police behavior, and climate change. The SPSS demonstrations are completely redone, both in the book and on the website's demonstration videos, using more recent data. Linneman applies his experience teaching his own students SPSS, knowing where students get confused, to clarify his explanations in these demonstrations.

The State of Sex Barbara Brents, Crystal Jackson, Kathryn Hausbeck, 2009-12-16 This study of Nevada's brothels uses empirical data and sociological theory to situate the United States' only legal brothel industry in the political economy of contemporary tourism. Criminological Perspectives on Race and Crime Shaun L. Gabbidon, 2010-02-25 Ideal for use in either crime theory or race and crime courses, this is the only text to look at the array of explanations for crime as they relate to racial and ethnic groups. Each chapter begins with a historical review of each theoretical perspective and how its original formulation and more recent derivatives account for racial/ethnic differences. The theoretical perspectives include those based on religion, biology, social disorganization, strain, subculture, labeling, conflict, social control, colonialism, and feminism. This new Second Edition includes discussions of Deadly Symbiosis, critical race theory, criminology, comparative conflict theory, maximization, and abortion, race and crime. In the closing chapter, the author considers which perspectives have shown the most promise in the area of race, ethnicity, and crime.
