Richardson, 2013-12-20 This book one of the most frequently cited works on Martin Heidegger in any language belongs on any short list of classic studies of Continental philosophy William J Richardson explores the famous turn Kehre in Heidegger's thought after Being in Time and demonstrates how this transformation was radical without amounting to a simple contradiction of his earlier views In a full account of the evolution of Heidegger's work as a whole Richardson provides a detailed systematic and illuminating account of both divergences and fundamental continuities in Heidegger's philosophy especially in light of recently published works He demonstrates that the thinking of Being for the later Heidegger has exactly the same configuration as the radical phenomenology of the early Heidegger once he has passed through the turning of his way Including as a preface the letter that Heidegger wrote to Richardson and a new writer's preface and epilogue Amazon com **BABA** Rajesh Kamath, 2023-07-03 Baba father or revered elder a common honorific in India for saints and holy men Baba a faceless name for the Masters of the Tradition who have shepherded and guided humanity since Eternity Baba the unique colours diffracted from one Consciousness Mahavatar Babaji Shirdi Sai Baba Sathya Sai Baba Bade Baba Neem Karoli Baba Meher Baba amongst countless others Baba the promise of the Tradition that never leaves a true seeker's hand transcending oceans of existence to be with them Baba the compassion incarnates who travel the seven worlds and seven seas to find and rescue a pure soul Baba the grand collaboration that ensures the continued preservation of dharma righteousness in the Universe This book is about the myriad interactions experiences and associations of Mohanji with various Masters of the Tradition Mohanji's journey from a seeker to a Guide and his continuing work in the world provides a unique window into how the Tradition orchestrates one of its projections From the fleeting to the profoundly engaging each connection reveals a facet of the Grand Tradition that operates selflessly unseen behind the shadows A rare glimpse into the inner workings of the Masters of the Tradition who though diverse in expressions operate in extreme unity and

purposefulness burning like candles to give light and purity to the world On the Phenomenology of the Consciousness of Internal Time (1893–1917) Edmund Husserl, 2012-12-06 *Synthesizing the Vedanta* Sean Doyle, Sean M. Doyle, 2006

Pierre Johanns is a key figure in the history of Christian intellectual engagement with Hindu philosophy. He was the most articulate figure in a group of Belgian Jesuits in Calcutta who sought to develop the theological project initiated by Brahmanabandhab Upadhyay, a convert to Catholicism whose theology conveyed a positive appreciation of aspects of Hindu Advaitic philosophy. Johanns began to publish a steady stream of articles in the monthly *Light of the East* that analysed pertinent features of Vedantic thought from the perspective of his neo-Thomistic presuppositions. Johanns engaged in a thorough explication and analysis of the thinking of the Hindu teachers Sankara, Ramanuja and Vallabha. He attempted to fashion a creative synthesis of their views, constructing a new holistic metaphysic from the raw material of their respective philosophical theologies. This book examines the theological writings of Pierre Johanns by situating him within his historical context, by discussing how Johanns interacted with Vedantic philosophy and by assessing the success of his project.

Social Structure and Forms of Consciousness, Volume 1 István Mészáros, 2010-02

This new work, the first in a two-volume series by the leading Marxian philosopher of our day, is a milestone in human self-understanding. It focuses on the location where action emerges from freedom and necessity, the foundation of all social science. Today, as never before, the investigation of the close relationship between social structure, defined by Marx as arising from the life process of definite individuals, and the various forms of consciousness is particularly important. We can only perceive what is possible by first identifying the historical process that constrains consciousness itself and therefore social action. The relationship between social structure and forms of consciousness discussed in this volume is multifaceted and profoundly dialectical. It requires the presentation of a great wealth of historical material and the assessment of the relevant philosophical literature from Descartes through Hegel and the Liberal tradition to the present, together with their connections with political economy and political theory. István Mészáros moves beyond both abstract solutions to the surveyed methodological questions and one-sided structuralist evaluation of the important substantive issues, bringing the process of our understanding of social structure and consciousness to a level not previously attained. Above all, in the spirit of the Marxian approach, even the most complicated problems are always analyzed in relation to the major practical concerns of our time. The primary aim of this work is to outline the dialectical intelligibility of historical development toward a viable societal reproductive order.

Social Structures and Forms of Consciousness is of the highest importance as both a political and philosophical work, illuminating the place from where we must act today.

Sensual Awakening A Tantric Approach Colin Drake, 2017-05-10

The main focus of this book is on Tantra, which entails using our mind, bodies and everything that we encounter to aid and cultivate Awakening from the dream that we are separate objects in a universe of such. The result of this is to reveal that we are expressions and instruments of Consciousness through which That can know and enjoy its physical manifestation, the universe and everything.

it contains Here are some comments by readers and listeners to the audio of some of the practices in the book Beautiful process Colin clarity simplicity and profundity Thanks for your passion and generosity Lots of love Paul I love your guided meditation A very lovely and kind offering I love your voice it is calm and it offers the vast space within which I can relish Self Love Shakti Thank you so much for your kind thoughtfulness in making this available It is such a wonderful and helpful support in coming to know myself as just this With love and gratitude Gaye *Consciousness revolution* Isha Judd,2006-02

The focus of this book is a calling to come home to our hearts To come back to the innocence and return to the love that is forever present Crises in Continental Philosophy Arleen B. Dallery, Charles E. Scott, P. Holley Roberts, 1990-01-01 This book punctuates the moments of crisis in continental thought from the foundational crisis of reason in Husserl's call for a rigorous science of phenomenology to the current crisis of postmodernism and its rejection of Husserl's metanarrative of history and rationality The mediating links between these moments is the centrality of the epochal history of Being the power of cultural and disciplinary practices and the dispersal of meaning in the post Husserlian and post subjective philosophies of Heidegger Foucault Derrida and others Included here are the thoughts of leading scholars who critically discuss Husserl's analysis of the crisis of Western thought and the importance of the concepts of world in Husserl's early writings The authors analyze the deprivileging of philosophy as social critique through the text of Husserl Habermas Foucault and recent feminist theory They examine the end of the epistemological and morally autonomous subject in continental thought Together these thoughts articulate multiple points or moments of crisis without cure or end **The Thinking Universe** Dr. Thomas Stark, The universe is a vast thought a cosmic process of thinking a living organism seeking to know itself It thinks about itself all the time and what it wants to know is exactly what it is The task of the universal thought is to become conscious of itself to become entirely self aware to attain Absolute Knowledge of itself The secret of thought is that it is the purest and clearest energy of all light energy Your mind is an immaterial electromagnetic system outside space and time When all of us become enlightened the resultant state of the universe is the God State of perfect light perfect reason perfect knowledge perfect understanding perfect symmetry perfect consciousness and perfect bliss God is in his heaven and all is right with the universe This is the State that awaits us all and which some humans the enlightened ones are actually bringing about right now Don't you want to be one of the Illuminated Ones Technique, Discourse, and Consciousness David Lovekin, 2022-05-19 This study examines the French thinker Jacques Ellul 1912 1994 and his historical biblical and social analyses of how technology manipulates and impoverishes modern thought culture and language In the spirit of Georg Hegel and Ernst Cassirer Ellul explores how technology begins in myths stories and religion advances to tools and then develops into data algorithms and abstract systems which are detached from human bodies and communities Efficiency then becomes an absolute in all areas of human life and the mentality of technique becomes lost in its creations These modern symbols posing as ultimate human goods and values are denigrated by technique leaving humanity awash in clichés in groundless

social media and in blathering slogans that sustain the illusion that politics and culture have now become *Selected Writings on the Awareness Principle* Peter Wilberg, 2007 If people get lost in thought or in their emotions in their work or chores or in any element of their everyday activity and experience then they may be conscious but they are not aware Awareness of the different elements of our conscious action and experience frees us from restricting attachments to them from a confining identification of ourselves with anything we think feel or do This Awareness Principle is both a liberatory life principle and a life practice of a sort long recognised in yogic philosophy As well as being a healing and freeing life principle and practice The Awareness Principle is also a new foundational principle for the sciences and religion offering the sole possible philosophical basis for both a new Theology and a truly scientific Theory of Everything For the most fundamental scientific fact is not the objective existence of a manifest universe of bodies in space and time but awareness of that universe In contrast to all current pseudo scientific attempts to explain awareness or consciousness however The Awareness Principle is the recognition that awareness cannot in principle be explained by or reduced to any thing whatsoever that we are aware of whether it be matter energy or the human body and brain Awareness is neither a by product of our bodies and brains nor the private property of any being or beings human or divine What we call God is neither Being with a big B nor some Supreme Being with awareness Instead God is awareness and the entire universe its manifestation And just as there can be nothing outside space or before time so there can be nothing outside or before the absolute and divine Awareness that is God Neither the Big Bang of physics the Big Being of philosophy nor a Supreme Being of the sort worshipped in the Abrahamic faiths all expressions of The Being Principle can explain the fundamental nature of God and the Universe The Awareness Principle can be based as it is on the recognition that The being of all things that exist in awareness in turn depends on awareness Abhinavagupta Peter Wilberg's writings on The Awareness Principle collected for the first time in this volume reaffirm and rearticulate in a new and clear cut way a centuries old understanding of Indian tantric philosophy namely that the 1st Principle of the universe is not matter or energy but the innate potentials and power Shakti of pure awareness Shiva

Heidegger W.J. Richardson, 2012-12-06 Dear Father Richardson It is with some hesitation that I attempt to answer the two principal questions you posed in your letter of March 1 1962 The first touches on the initial impetus that determined the way my thought would go 1 The other looks for information about the much discussed reversal in my development I hesitate with my answers for they are necessarily no more than indications of much more to be said The lesson of long experience leads me to surmise that such indications will not be taken as directions for the road of independent reflection on the matter pointed out which each must travel for himself Instead they will gain notice as though they were an opinion I had expressed and will be propagated as such Every effort to bring what has been thought closer to prevailing modes of representation must assimilate what is to be thought to those representations and thereby inevitably deform the matter 2 This preamble is not the lament of a man misunderstood it is rather the recognition of an almost insurmountable difficulty in making oneself

Robin E. Harger,2014-09-16 **Process Approaches to Consciousness in Psychology, Neuroscience, and Philosophy of Mind** Michel Weber,Anderson Weekes,2009-11-18 This collection opens a dialogue between process philosophy and contemporary consciousness studies Approaching consciousness from diverse disciplinary perspectives philosophy psychology neuroscience neuropathology psychotherapy biology animal ethology and physics the contributors offer empirical and philosophical support for a model of consciousness inspired by the process philosophy of Alfred North Whitehead 1861 1947 Whitehead s model is developed in ways he could not have anticipated to show how it can advance current debates beyond well known sticking points This has trenchant consequences for epistemology and suggests fresh and promising new perspectives on such topics as the mind body problem the neurobiology of consciousness animal consciousness the evolution of consciousness panpsychism the unity of consciousness epiphenomenalism free will and causation **Hegel's**

Recollection Donald Phillip Verene, 1985-06-30 Donald Phillip Verene has advanced a completely new reading of Hegel's Phenomenology of Spirit. He shows that the philosophic meaning of this work depends as much on Hegel's use of metaphor and image as it does on Hegel's dialectical and discursive descriptions of various stages of consciousness. The focus is on Hegel's concept of recollection (Erinnerung). Consciousness confronts itself with the aim of achieving absolute knowing. This is the first commentary to regard metaphor, irony, and memory as keys to the understanding of Hegel's basic philosophical position.

Freedom As a Value David Detmer, 2013-12-15 This dramatic re-evaluation of Sartre's ethical theory establishes its author as a leading American exponent of phenomenology and wins many new followers for Sartre in the English-speaking world.
