Applying Theory and Research to Learning Japanese as a Foreign Language Masahiko

Minami,2009-03-26 Complex issues surround second language acquisition and foreign language learning in any language There is no doubt that individuals are capable of acquiring two or more languages at different stages of human development particularly in childhood Research investigating how adults acquire two languages also carries important insights into what takes place during later stages of human development From the fact that early and late bilinguals are faced with two languages in diverse stages of cognitive development we can predict differences in language processing between these two groups In the case of the Japanese language unfortunately far fewer studies particularly those written in English have been presented on foreign language learners and bilingual children Designed to address some of these gaps in the literature the chapters included in this book discuss various issues with regard to adult learners of Japanese as an L2 and English Japanese bilingual children This book provides the reader with an overview of the field of Japanese linguistics and its current concerns One of the main purposes of the book is to provide a forum in which to examine contributions in a variety of areas of Japanese linguistics to the teaching and learning of Japanese in the L2 classroom This book has at least two interrelated

areas of benefit First both researchers and teachers benefit from each other's expertise and receive new insights that apply to their respective fields Second and more important the book serves as a forum to promote ways in which we can apply linguistic theory to the learning of Japanese as an L2 That is what researchers have learned from both theory and practice can suggest what is important for the teaching of language conversely language educators have a great deal to offer linguists regarding the phenomenon of language Thus the goal of this book is to integrate theoretical concepts and empirical research findings in L2 development in order to apply them to educational practice

Media in Foreign Language Teaching and Learning Wai Meng Chan,Kwee Nyet Chin,Masanori Nagami,Titima Suthiwan,2011-10-27 While educators and educational psychologists debate the influence of media on learning there can be little doubt that media is now an integral constituent of any educational context In particular computer and internet media

with their immense processing power and multimedia capabilities can have significant bearing on learning processes and outcomes in today's learning environment. Such media, which are increasingly designed to be highly interactive and adaptable, can enable reflective, productive, and communicative activities and have much potential for foreign language learning. The book contains 16 papers which look at different forms of media and explore how these affect or can be used effectively in foreign language education. The first of three parts focuses on important theoretical and pedagogical issues in selecting and using media. In the second part, insightful empirical research findings are presented on the contributions of different forms of media in language teaching and learning, including their effect on learners' learning motivation. The third and concluding part of the book provides in-depth accounts of how media can be harnessed to drive innovative curricular practice as well as students' evaluations of these curricular projects.

Practicing Critical Pedagogy Mary Frances Agnello, William Martin Reynolds, 2015-12-22 This edited text recaptures many of Joe L. Kincheloe's national and international influences. An advocate and a scholar in the social, historical, and philosophical foundations of education, he dedicated his professional life to his vision of critical pedagogy. The authors in this volume found mentorship as well as kinship in Joe and express the many ways in which he and his work made profound differences in their work and lives. Joe's research always pushed the limits of what critically reflective and informed teaching entailed, never diluting the import of comprehending the complexity of sociopolitical, cultural, economic, and educational discourses and practices. Dedicated to a praxis of social and political activism rooted in students' development as citizens and workers, the labor of teachers as action researchers, cultural workers, and social mediators is always at the heart of all he achieved. We who were so influenced directly and indirectly by him knew his genius and relished the generosity with which he shared his ideas, advice, encouragement, and art. The world is better because of Joe L. Kincheloe's scholarship, inextricably related to critical thinking and enactment of education that tenaciously interrupts complacency, mediocrity, always responding thoughtfully to particular educational contexts.

Teaching and Learning Japanese Martial Arts: Scholarly Perspectives, Vol. 2 Michael DeMarco, 2017-03-21 In contrast to the overabundance of writings about martial arts that are often promotional and misinformative there are rare works by scholars that are praiseworthy for their sincere unbiased approach to writing This is the very definition of scholarly This two volume anthology brings together the best scholarly works published in the Journal of Asian Martial Arts on the topic of teaching and learning Japanese martial arts In this second volume you ll find eight chapters that dive deep into Japanese martial traditions combining aspects of history and culture that explain how teaching methods developed and evolved Chapter one asks What defines and gives meaning to the practice of karate The Dr Wingate looks to the ideology of karate as presented in the writings of founder Ginchin Funakoshi and traditional Japanese martial arts as ways of self cultivation This ideology is often greatly different from the ideology held by modern practitioners This chapter explores the differences Next Dr Donohue comments on the ideological complex surrounding training in the Japanese martial traditions These systems while remaining relatively uniform through time have in fact been subject to considerable philosophical interpretation and emphasis Why many practice martial artists has little to do with the essential nature of these arts Dr Grossman presents a thesis in his chapter that we can arrive at a deeper understanding of any martial arts using aikido as an example if we consider it to be a symbolic form of communication as well as a martial art and utilize the science of semiotics to translate the message encoded in the body language of aikido techniques A photographic technical section illustrates this process The next chapter by Sakuyama Yoshinaga discusses the potential growth for learning in children How can adults

provide the best learning environment The author believes that inspiration comes through subtle emotions of the human heart influencing others The theory is found in ancient samurai traditions and applied by the author in teaching Shorinji Kempo Chapter five by Dr Dykhuizen point out how Asian martial arts are being practiced in cultures other than those within which they originated Specific information concerning how practitioners from different cultures understand them becomes increasingly useful to martial artists and martial arts scholars This chapter summarizes findings of an investigation among aikido practitioners The Japanese Imperial family is said to have been given three symbols of authority by the gods a mirror a jewel and a sword Dr Donohue uses this symbolic structure to discuss varying perspectives on the Japanese martial arts Each aid in our understanding and appreciation of the multifaceted dimensions of the martial arts In his chapter Dr Edinborough examines how Japanese martial arts specifically the approach developed by Inaba Minoru can be functionally understood as a form of art Through referring to the aesthetic theories the article examines budo as a means of organizing experience recognizable alongside painting dance theater and literature The final chapter by Marvin Labbate looks close at the training hall Dressed in a uniform students line up in a ready position come to attention sit meditate and bow This ritualized pattern is performed at the beginning during and at the end of each class but what does it mean In this chapter each element of the ritualized pattern will be discussed to provide a clear understanding of its original intent If you are interested in Japanese martial traditions you will find much in these eight chapters that clarify why the arts are taught according to a longstanding tradition and also why there have been evolutionary changes in the instructional methods There is sound logic for the old traditions as well as for the changes The scholarly research presented in this anthology will improve a teacher s way of instructing and help a student understand what to expect out of his or her studies
