The Lotus Generation:

Genesis of the Cosmos Paul A. LaViolette, 2004-04-15 Provides compelling evidence that creation myths from the dawn of civilization correspond to cutting edge astronomical discoveries Exposes the contradictions in current cosmological theory and offers a scientific basis for the ancient myths and esoteric lore that encode a theory of continuous creation By the scientist who was the first to disprove the Big Bang theory on the basis of observational data Recent developments in theoretical physics including systems theory and chaos theory are challenging long held mechanistic views of the universe Many thinkers have speculated that the remnants of an ancient science survive today in mythology and esoteric lore but until now the scientific basis for this belief has remained cloaked in mystery Paul LaViolette reveals the remarkable parallels between the cutting edge of scientific thought and creation myths from the dawn of civilization With a scientific sophistication rare among mythologists LaViolette deciphers the forgotten cosmology of ancient lore in a groundbreaking scientific tour de force In direct nontechnical language he shows how these myths encode a theory of cosmology in which matter is continually growing from seeds of order that emerge spontaneously from the surrounding subquantum chaos Exposing the contradictions that bedevil the big bang theory LaViolette offers both the specialist and the general reader a controversial and highly stimulating critique of prevailing misconceptions about the seldom questioned superiority of modern science over ancient cosmology By restoring and reanimating this ancient scientific worldview *Genesis of the Cosmos* leads us beyond the restrictive metaphors of modern science and into a new science for the 21st century , *The Jepson Manual* Bruce G. Plant Lore, Legends, and Lyrics Embracing the Myths, Traditions, Superstitions, and Folk-Lore of the Plant Kingdom Richard Folkard,2020-09-28 THE analogy existing between the vegetable and animal worlds and the resemblances between human and tree life have been observed by

man from the most remote periods of which we have any records Primitive man watching the marvellous changes in trees and plants which accurately marked not only the seasons of the year but even the periods of time in a day could not fail to be struck with a feeling of awe at the mysterious invisible power which silently guided such wondrous and incomprehensible operations Hence it is not astonishing that the early inhabitants of the earth should have invested with supernatural attributes the tree which in the gloom and chill of Winter stood gaunt bare and sterile but in the early Spring hastened to greet the welcome warmth giving Sun by investing itself with a brilliant canopy of verdure and in the scorching heat of Summer afforded a refreshing shade beneath its leafy boughs So we find these men of old who had learnt to reverence the mysteries of vegetation forming conceptions of vast cosmogonic world or cloud trees overshadowing the universe mystically typifying creation and regeneration and yielding the divine ambrosia or food of immortality the refreshing and life inspiring rain and the mystic fruit which imparted knowledge and wisdom to those who partook of it So again we find these nebulous overspreading world trees connected with the mysteries of death and giving shelter to the souls of the departed in the solemn shade of their dense foliage Looking upon vegetation as symbolical of life and generation man in course of time connected the origin of his species with these shadowy cloud trees and hence arose the belief that humankind first sprang from Ash and Oak trees or derived their being from Holda the cloud goddess who combined in her person the form of a lovely woman and the trunk of a mighty tree In after years trees were almost universally regarded either as sentient beings or as constituting the abiding places of spirits whose existence was bound up in the lives of the trees they inhabited Hence arose the conceptions of Hamadryads Dryads Sylvans Tree nymphs Elves Fairies and other beneficent spirits who peopled forests and dwelt in individual trees not only in the Old World but in the dense woods of North America where the Mik amwes like Puck has from time immemorial frolicked by moonlight in the forest openings Hence also sprang up the morbid notion of trees being haunted by demons mischievous imps ghosts nats and evil spirits whom it was deemed by the ignorant and superstitious necessary to propitiate by sacrifices offerings and mysterious rites and dances Remnants of this superstitious tree worship are still extant in some European countries The Irminsul of the Germans and the Central Oak of the Druids were of the same family as the Asherah of the Semitic nations In England this primeval superstition has its descendants in the village maypole bedizened with ribbons and flowers and the Jack in the Green with its attendant devotees and whirling dancers The modern Christmas tree too although but slightly known in Germany at the beginning of the present century is evidently a remnant of the pagan tree worship and it is somewhat remarkable that a similar tree is common among the Burmese who call it the Padaytha bin This Turanian Christmas tree is made by the inhabitants of towns who deck its Bamboo twigs with all sorts of presents and pile its roots with blankets cloth earthenware and other useful articles
