The Man Who Quit Money Mark Sundeen, 2012-03-06 Grand Prize Winner of the 2015 Green Book Festival Mark Sundeen's new book *The Unsettlers* is coming in January 2017 from Riverhead Books In 2000 Daniel Suelo left his life savings all thirty dollars of it in a phone booth He has lived without money and with a newfound sense of freedom and security ever since *The Man Who Quit Money* is an account of how one man learned to live sanely and happily without earning receiving or spending a single cent Suelo doesn't pay taxes or accept food stamps or welfare He lives in caves in the Utah canyonlands forages wild foods and gourmet discards He no longer even carries an I D Yet he manages to amply fulfill not only the basic human needs for shelter food and warmth but to an enviable degree the universal desires for companionship purpose and spiritual engagement In retracing the surprising path and guiding philosophy that led Suelo into this way of life Sundeen raises provocative and riveting questions about the decisions we all make by default or by design about how we live and how we might live better **Jesus and the Politics of Mammon** Hollis Phelps, 2019-10-22 In *Jesus and the Politics of Mammon* Phelps uses contemporary critical theory continental philosophy and theology to develop a radical reading of Jesus Phelps argues that theological traditions have on the whole blunted Jesus teachings particularly in regard to money and related concerns of political economy Focusing on the distinction between God and Mammon Phelps suggests instead that Jesus teachings result in a politics that is anti money anti work and anti family Although Jesus does not provide a specific program for this politics his teachings incite readers to think otherwise with respect to these institutions

Pallitto, 2020-08-17 Cell phone apps share location information software companies store user data in the cloud biometric scanners read fingerprints employees of some businesses have microchips implanted in their hands In each of these instances we trade a share of privacy or an aspect of identity for greater convenience or improved security What Robert M Pallitto asks in *Bargaining with the Machine* is whether we are truly making such bargains freely whether in fact such a transaction can be conducted freely or advisedly in our ever more technologically sophisticated world Pallitto uses the social theory of bargaining to look at the daily compromises we make with technology Specifically he explores

whether resisting these bargains is still possible when the technologies in question are backed by persuasive even coercive corporate and state power Who he asks is proposing the bargain What is the balance of bargaining power What is surrendered and what is gained And are the perceived and the actual gains and losses the same that is what is hidden At the center of Pallitto's work is the paradox of bargaining in a world of limited agency Assurances that we are in control are abundant whether we are consumers voters or party to the social contract But when purchasing goods from a technological behemoth like Amazon or when choosing a candidate whose image is crafted and shaped by campaign strategists and media outlets how truly free let alone informed are our choices The tension between claims of agency and awareness of its limits is the site where we experience our social lives and nowhere is this tension more pronounced than in the surveillance society This book offers a cogent analysis of how that complex contested and even paradoxical experience arises as well as an unusually clear and troubling view of the consequential compromises we may be making

Anti-Consumption Hélène Cherrier, Michael S W Lee, 2022-09-01 In this edited volume the leading scholars in the field engage with consumers marketers corporations and policymakers as well as space dynamics and network formation to provide an in depth examination of anti consumption a voluntary behavioural inclination to minimise rather than grow to decelerate and simplify and to reduce the unnecessary exploitation of resources fuelled by consumer culture This book does not place anti consumption on the high moral ground but rather demonstrates its complexity to spur innovative and critical thinking on how people organisations businesses and governments can treat consumption more as a necessity for survival than as a tool for self expression pleasure and economic growth The first part of this book looks at anti consumption from a diversity of perspectives It analyses voluntary simplicity a self motivated engagement in consumption reduction and boycotting a politically motivated reaction against unacceptable corporate practices as distinct manifestations of anti consumption that nonetheless remain rooted in the logic of the market Paving the way to critical perspectives on the interface between anti consumption people and the environment the second part of the book projects anti consumption to issues of waste production and provides possible answers to global challenges of resources depletion social inequalities and global warming In this section anti consumption is critically assessed as an actor of change both in terms of social change and paradigm change To move the field forward the third part of this book presents several theoretical frameworks that help set a roadmap for future research Anti Consumption will be of direct interest to scholars and researchers within the fields of marketing consumer research business studies environmental studies and sustainability It will also be of value to those researching the economics and or sociology of markets
