Understanding Analysis and its Connections to Secondary Mathematics Teaching Nicholas H. Wasserman,Timothy Fukawa-Connelly,Keith Weber,Juan Pablo Mejía Ramos,Stephen Abbott,2022-01-03 Getting certified to teach high school mathematics typically requires completing a course in real analysis Yet most teachers point out real analysis content bears little resemblance to secondary mathematics and report it does not influence their teaching in any significant way This textbook is our attempt to change the narrative It is our belief that analysis can be a meaningful part of a teacher s mathematical education and preparation for teaching This book is a companion text It is intended to be a supplemental resource used in conjunction with a more traditional real analysis book The textbook is based on our efforts to identify ways that studying real analysis can provide future teachers with genuine opportunities to think about teaching secondary mathematics It focuses on how mathematical ideas are connected to the practice of teaching secondary mathematics and not just the content of secondary mathematics itself Discussions around pedagogy are premised on the belief that the way mathematicians do mathematics can be useful for how we think about teaching mathematics The book uses particular situations in teaching to make explicit ways that the content of real analysis might be important for teaching secondary mathematics and how mathematical practices prevalent in the study of real analysis can be incorporated as practices for teaching This textbook will be of particular interest to mathematics instructors and mathematics teacher educators thinking about how the mathematics of real analysis might be applicable to secondary teaching as well as to any prospective or current teacher who has wondered about what the purpose of taking such courses could be

Mathematics Curriculum in School Education Yeping Li, Glenda Lappan, 2013-11-19 Mathematics curriculum which is often a focus in education reforms has not received extensive research attention until recently. Ongoing mathematics curriculum changes in many education systems call for further research and sharing of effective curriculum policies and practices that can help lead to the improvement of school education. This book provides a unique international perspective on diverse curriculum issues and practices in different education systems, offering a comprehensive picture of various stages along curriculum transformation from the intended to the achieved and showing how curriculum changes in various stages contribute to mathematics teaching and learning in different educational systems and cultural contexts. The book is organized to help readers learn not only from reading individual chapters but also from reading across chapters and sections to explore broader themes including: Identifying what is important in mathematics for teaching and learning in different education systems; Understanding mathematics curriculum and its changes that are valued over time in different education systems; Identifying and analyzing effective curriculum practices; Probing effective infrastructure for curriculum development and implementation. **Mathematics Curriculum in School Education** brings new insights into curriculum policies and practices to the international community of mathematics education with 29 chapters and four section prefaces contributed by 56 scholars from 14 different education systems. This rich collection is indispensable reading for mathematics educators, researchers, curriculum developers, and graduate students interested in learning about recent curriculum development research and practices in different education systems. It will help readers to reflect on curriculum policies and practices in their own education systems and also inspire them to identify and further explore new areas of curriculum research for improving mathematics teaching and learning.

Mathematics for Life and Work: A Comparative Perspective on Mathematics to Inform Upper Secondary Reform in England OECD, 2024-11-05 Engagement and performance in mathematics at the upper secondary level have been the concern of successive governments in England. This report was commissioned as part of the country's policy reflections for transforming how maths is viewed and experienced in England. The report explores outcomes such as the share of students studying maths and performance across countries and how education systems internationally deliver mathematics in upper secondary. It also examines factors shaping maths education, including the expectations set by curricula, student pathways, cultural perceptions, and the needs of the labour market and higher education.
