Downwind of the Atomic State James C. Rice, 2025-04 2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked ignored and denied the catastrophic fallout of decades of nuclear testing in the American West In December of 1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through much of the country In this important work James C Rice tells the hidden story of nuclear weapons testing and the negligence of the US government in protecting public health *Downwind of the Atomic State* focuses on the key decisions and events shaping the Commission's mismanagement of radiological contamination in the region specifically on how the risks of fallout were defined and redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere they did not understand or seem to care that the radioactivity would irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we being exposed to by large organizations under the guise of security and science

Rummel to understand and place in historical perspective the entire subject of genocide and mass murder or what he calls democide It is the fifth in a series of volumes in which he offers a detailed analysis of the 120 000 000 people killed as a result of government action or direct intervention In Power Kills Rummel offers a realistic and practical solution to war democide and other collective violence As he states it The solution is to foster democratic freedom and to democratize coercive power and force That is mass killing and mass murder carried out by government is a result of indiscriminate irresponsible Power at the center Rummel observes that well established democracies do not make war on and rarely commit lesser violence against each other The more democratic two nations are the less likely is war or smaller scale violence between them The more democratic a nation is the less severe its overall foreign violence the less likely it will have domestic collective violence and the less its democide Rummel argues that the evidence supports overwhelmingly the most important fact of our time democracy is a method of nonviolence
