Open and Distance Education in Asia, Africa and the Middle East Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18 This book is open access under a CC BY 4.0 license. This book describes the history, structure, and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa, and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe, and the Americas* (Springer, 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics, and students interested in understanding the different approaches to open and distance education.

#RhodesMustFall B. Nyamnjoh, 2016-04-18 This book on rights, entitlements, and citizenship in post-apartheid South Africa shows how the playing field has not been as levelled as presumed by some, and how racism and its benefits persist. Through everyday interactions and experiences of university students and professors, it explores the question of race in a context still plagued by remnants of apartheid inequality and perceptions of inferiority and inadequacy among the majority black population. In education, black voices and concerns go largely unheard as circles of privilege are continually regenerated and added onto a layered and deep history of cultivation of black pain. These issues are examined against the backdrop of organised student protests sweeping through the country's universities with a renewed clamour for transformation around a rallying cry of Black Lives Matter. The nuanced complexity of this insightful analysis of the Rhodes Must Fall movement elicits compelling questions about the attractions and dangers of exclusionary articulations of belonging. What could a grand imperialist like the stripling Uitlander or foreigner of yesteryear, Sir Cecil John Rhodes, possibly have in common with the present-day nimble-footed makwerekwere from Africa north of the Limpopo? The answer, Nyamnjoh suggests, is to be found in how human mobility relentlessly tests the boundaries of citizenship.
