Topics addressed by the workshops are business intelligence and data mining, BIDM 2008, health data management, IWHDM 2008, and data engineering and Web technology research, DeWeb 2008. The papers focus on issues such as Web searching, Web services, database data mining, bioinformatics, and business intelligence.

**Formal Aspects of Component Software** Farhad Arbab, Peter Csaba Ölveczky, 2012-12-15. This book constitutes revised selected papers of the 8th International Workshop on Formal Aspects of Component Software FACS 2011 held in Oslo, Norway, in September 2011. The 18 full papers presented together with 3 invited talks were carefully reviewed and selected from 46 submissions. They cover the topics of formal models for software components and their interaction, design and verification methods for software components and services, formal methods and modeling languages for components and services, industrial or experience reports and case studies, autonomic components and self managed applications, models for QoS and other extra functional properties, e.g., trust, compliance, security of components and services, formal and rigorous approaches to software adaptation and self adaptive systems, and components for real time safety critical, secure, and/or embedded systems.

**Systems Analysis and Design: People, Processes, and Projects** Keng Siau, Roger Chiang, Bill C. Hardgrave, 2015-03-26. For the last two decades, IS researchers have conducted empirical studies leading to a better understanding of the impact of Systems Analysis and Design methods in business, managerial, and cultural contexts. SA/SD research has established a balanced focus not only on technical issues but also on organizational and social issues in the information society. This volume presents the very latest state of the art research by well known figures in the field. The chapters are grouped into three categories: techniques, methodologies, and approaches.

JavaTech, an Introduction to Scientific and Technical Computing with Java Clark S. Lindsey, Johnny S. Tolliver, Thomas Lindblad, 2005-10-13. JavaTech is a practical introduction to the Java programming language with an emphasis on the features that benefit technical computing. After presenting the basics of object oriented programming in Java, it examines introductory topics such as graphical interfaces and thread processes. It goes on to review network programming and develops Web client/server examples for tasks such as monitoring remote devices. The focus then shifts to distributed computing with RMI. Finally, it examines how Java programs can access the local platform and interact with hardware. Topics include combining native code with Java.

communication via serial lines and programming embedded processors An extensive web site supports the book with additional instructional materials JavaTech demonstrates the ease with which Java can be used to create powerful network applications and distributed computing applications It will be used as a textbook for programming courses and by researchers who need to learn Java for a particular task

#### **Natural Language Processing and Information Systems**

Birger Andersson, Maria Bergholtz, P. Johannesson, 2003-07-01 The workshop on Applications of Natural Language to Information Systems NLDB has since 1995 provided a forum for academic and industrial researchers and practitioners to discuss the application of natural language to both the development and use of software applications

The use of natural language in relation to software has contributed to improving the development of software from the viewpoints of both the developers and the users Developers benefit from improvements in conceptual modeling software validation natural language program specifications and many other areas Users benefit from increased usability of applications through natural language query interfaces semantic webs text summarizations etc The integration of natural language and information systems has been a search objective for a long time now Today the goal of good integration seems not so far fetched This is due mainly to the rapid progress of research in natural language and to the development of new and powerful technologies The integration of natural language and information systems has become a convergent point towards which many researchers from several research areas are focussing

#### **Software Engineering: Challenges and Solutions**

Lech Madeyski, Michał Śmiałek, Bogumiła Hnatkowska, Zbigniew Huzar, 2016-08-29 This book presents the proceedings of the KKIO Software Engineering Conference held in Wrocław Poland in September 15-17 2016 It contains the carefully reviewed and selected scientific outcome of the conference which had the motto Better software more efficient enterprise challenges and solutions Following this mission this book is a compilation of challenges and needs of the industry as well as research findings and achievements that could address the posed problems in software engineering Some of these challenges included in the book are increasing levels of abstraction for programming constructs increasing levels of software reuse increasing levels of automation optimizing software development cycles The book provides a platform for communication between researchers young and established and practitioners

#### **Ecosystems Knowledge**

Samuel Szoniecky, 2018-07-31 To analyze complex situations we use everyday analogies that allow us to invest in an unknown domain knowledge we have acquired in a known field In this work the author proposes a modeling and analysis method that uses the analogy of the ecosystem to embrace the complexity of an area of knowledge After a history of the ecosystem concept and these derivatives nature ecology environment from antiquity to the present the analysis method based on the modeling of socio semantic ontologies is presented followed by practical examples of this approach in the areas of software development digital humanities Big Data and more generally in the area of complex analysis
