Environmental Management Accounting for Cleaner Production Stefan Schaltegger, Martin Bennett, Roger L. Burritt, Christine M. Jasch, 2008-10-10 Sustainability requires companies to develop in an economically environmentally and socially sustainable manner Corporate sustainable development in turn requires movement towards cleaner production In order to recognize the potential from cleaner production reduced costs and fewer environmental impacts through the reduced use of materials environmental management accounting EMA is a necessary information management tool Environmental Management Accounting for Cleaner Production reveals a set of tools for companies to collect evaluate and interpret the information they need to estimate their potential to use cleaner production to realize cost savings and to make the best decisions about the available cleaner production options EMA is therefore the key for driving environmental progress cost savings increased competitiveness and corporate sustainability through the means of cleaner production

Resources in Education, 1991 INIS Atomindex, 1983 **Free Radicals in Chemistry and Biology** Milan Lazar, 1989-03-31 Elementary radical reactions are described in terms of fundamental knowledge of organic chemistry and chemical physics in this valuable reference text The complex radical processes of nonchain and chain mechanisms such as dimerization alkylation polymerization telomerization halogenation pyrolysis oxidation and combustion are complemented by reactions in chemical lasers and in the cosmos as well as by reactions in biological objects under normal or pathological metabolism The text also provides the synthesis of facts from various fields of research and involves mechanisms where free radicals appear either as main or side intermediates in one of the several alternatives of the reaction pathway Highlights include 38 tables and 39 figures Frontiers of Free Radical Chemistry William Pryor, 2012-12-02 Frontiers of Free Radical Chemistry covers the proceedings of the 1979 symposium on Frontiers of Free Radical Chemistry held in Louisiana State University Chemistry Department supported by the Exxon Education Foundation The contributors discuss the mechanisms of hydrocarbon cracking oxidation processes inhibition and the theory of organic radical reactions halogenations and organic peroxide chemistry This book is organized into three parts encompassing 15 chapters Part I deals with the understanding of molecular and free radical mechanisms in predicting thermochemical data for radicals and molecules This part also describes the relationship between distortions of organic molecules and the reactions of pericyclic ionic and radical molecules Part II presents quantitative evaluations of gas phase reactions of carbynes and hydrocarbon pyrolysis and cracking Discussions on the reactions of free atoms and radicals in the chemistry of the stratosphere and natural troposphere with an emphasis on the ozone layer and its potential depletion by artificial pollutants are included in this part Part III explores the pertinent free radical reactions related to fuel research Petroleum chemists researchers and engineers will find this book invaluable

Chemistry D. C. Nonhebel, J. C. Walton, 1974-01-31 **Radical Chemistry** Michael John Perkins, 2023 Radicals reactive molecular fragments which may participate in chemical reactions and are frequently associated with disease but are now recognized to be important in polymer synthesis This text helps upper undergraduates understand the basics of radical chemistry in a modern context and how it is being used in organic synthesis mediators of many disease conditions and the control of enzyme action *Radical Reactions in Aqueous Media* V. Tamara Perchyonok, 2010 Radical Reactions in Aqueous Media provides a step wise introduction taking students from the basic principles of radical reactions through to their applications in industry and their role in biological and environmental processes Jacket **Half a Century of Free Radical Chemistry** Derek H. R. Barton, Sir Derek Barton, Shyamal I. Parekh, 1993-04-15 This book describes the experience over 25 years of the senior author with the chemistry of organic free radicals It begins with a mechanistic study of industrial importance on the pyrolysis of chlorinated alkanes It continues with a theory on the biosynthesis of phenolate derived alkaloids involving phenolate radical coupling There follows 20 years of practical work to prove the theory correct especially in the case of morphine alkaloids The book then describes the work on nitrile photolysis Barton reaction which involved the invention of new radical chemistry leading to a simple synthesis of the important hormone aldosterone There follows a description of the invention of an important new method for the deoxygenation of biologically important molecules especially sugars and nucleosides using radical chemistry applied to thiocarbonyl derivatives Some years later in a logical extension to carboxylic acids another new reaction was invented which provides carbon nitrogen oxygen and other radicals under mild conditions A final chapter summarizes recent applications of thiocarbonyl group derived radical reactions by other authors
