What Does The Guide Number Of A Flash Describe:

The Manual of Photography Elizabeth Allen, Sophie Triantaphyllidou, 2012-11-12 The tenth edition of The Manual of Photography is an indispensable textbook for anyone who is serious about photography. It is ideal if you want to gain insight into the underlying scientific principles of photography and digital imaging whether you are a professional photographer, lab technician, researcher, or student in the field, or simply an enthusiastic amateur. This comprehensive guide takes you from capture to output in both digital and film media, with sections on lens use, darkroom techniques, digital cameras and scanners, image editing techniques, and processes, workflow, digital file formats, and image archiving. This iconic text was first published in 1890 and has aided many thousands of photographers in developing their own techniques and understanding of the medium. Now in full colour, The Manual of Photography still retains its clear, reader-friendly style and is filled with images and illustrations demonstrating the key principles. Not only giving you the skills and know-how to take stunning photographs, but will also allow you to fully understand the science behind the creation of great images.

Mastering Canon EOS Flash Photography, 2nd Edition Nk Guy, 2016-03-18 In this updated second edition of the authoritative bestselling *Mastering Canon EOS Flash Photography*, photographer NK Guy brings the book fully up to date with coverage of all the newest Canon gear that has hit the market since the first edition published in 2010. This includes coverage of the radio-enabled Canon Speedlite 600EX RT and Canon Speedlite Transmitter ST-E3-RT, as well as the other Speedlites that have been released since the first edition's publication: Canon Speedlite 90EX, 270EX II, 320EX, and 600EX. And this is the first book to cover Canon's new affordable master unit, the Speedlite 430EX III RT flash. Digital cameras and flash technology have truly revolutionized photography in the 21st century. Originally seen simply as a practical way to illuminate dark scenes with portable light, flash today is used for a host of creative and nuanced applications, including supplementing daylight, designing complex scenes lit by multiple light sources, and simply creating beautiful, controllable light for portraiture. With LCD screens on DSLRs, the ability to get instant feedback on lighting setups is a great help in advancing one's lighting capabilities and encouraging experimentation. However, flash photography can still be a difficult artistic and technical challenge. It's simple to get that harsh deer-in-the-headlights look from built-in automatic flash, but it is a far cry from beautiful light. Creating natural-looking images is not nearly as straightforward. Mastering the properties of light and the ability to manipulate, craft, and direct it is a lifelong endeavor. Those diving into Speedlights need some help. Manuals are terse, and the terminology is confusing; this is where *Mastering Canon EOS Flash Photography* comes in. This is the complete book on the subject, guiding you through Canon's Speedlite system from off-camera portable flash to professional studio lighting. It covers the fundamentals of flash metering, technology, discusses key lighting concepts, and documents a wide range of Canon and third-party equipment. Universal flash accessories, studio gear, and radio triggers are all thoroughly covered. The book is lavishly illustrated with diagrams that demonstrate important functions and lighting arrangements, and inspiring photos that show sophisticated flash techniques.

Though tailored for users of Canon EOS cameras owners of other camera systems will find much valuable information as well So whether you re just getting started with flash or you ve picked up the bug for off camera lighting from such popular websites as Strobist com or you re making the leap into advanced studio work Mastering Canon EOS Flash Photography is your in depth resource Includes a foreword by David Hobby noted photojournalist and founder of Strobist com **Still Photographic Specialist (AFSC 23152)** Clifford Nation,1985 **Crime Scene Photography** Edward M.
