

Characteristics and Origins of Life

The Origin of Life

- Characteristics of Life: to be considered alive a molecule must...
 - Be organic. The organic molecules needed are amino acids, the building blocks of life
 - Have a metabolism
 - Be capable of replication
- Learning about the origin of life: to look for information regarding the origin of life, scientists...
 - Perform experiments to recreate the environmental conditions found at that time
 - Study the living creatures that make their homes in the types of extreme environments that were typical in Earth's early days
 - Seek traces of life left by ancient microorganisms, also called **microbes**, such as microscopic features or isotopic ratios indicative of life

Study Tip

The central dogma of biology validates the importance of the Miller-Urey experiment: DNA transcribes into RNA, which translates into amino acids, which combine to form proteins, the building blocks of life.

Amino acids form polypeptide chains

Amino Acids

- **Amino acids** are the building blocks of life because they create proteins
 - Linked together by covalent bonds to form polymers called polypeptide chains
- Proteins are the most abundant class of biological molecules
- Miller-Urey Experiment
 - Placed hydrogen, methane, and ammonia in a flask of heated water that created water vapor, which was called primordial soup and simulated the Earth's early atmosphere. Sparks simulated lightning, and the gases combined to form water-soluble organic compounds including amino acids
- Might have also originated at hydrothermal vents or deep in the crust where Earth's internal heat is the energy source

Studies of contemporary black women are rare and scattered and are often extensions of a legacy beginning in the 19th century that characterized black women as domineering matriarchs prostitutes or welfare queens negative characterizations that are perpetuated by both white and non white social scientists Based on over 200 interviews this book departs from these conventions in significant ways and using a collective memory conceptual framework shows how black women cope with and interpret lives often limited by racial barriers not of their making **Well-being in India** Lance Brennan,John McDonald ,Ralph Shlomowitz, By using data on the height and weight of Indians measured in the nineteenth and twentieth centuries for commercial or scientific reasons the studies in this book trace trends in rural well being in North and South India over time and consider the comparative well being of different groups of men and women It also addresses questions of infant and child health and examines the influence of reservation for social groups on the physical markers of well being
