Language Change in Real- and Apparent-Time Karen V. Beaman, 2024-03-27. This book makes the case for the value of a combined panel and trend study approach in studying real and apparent time language change to reconcile conspicuous disparities between the individual and the community. Through an examination of the Swabian dialect in southwestern Germany in two speech communities over four decades, this volume resolves critical methodological challenges in investigating lifespan and community change. This work affirms the importance of the speech community in shaping change and demonstrates how speakers' notions of local identity and community belonging inform their choice of linguistic variants. Drawing on a comprehensive integrated methodology, this research brings together diverse approaches for measuring changing social constructs and analyzing linguistic structures using state-of-the-art statistical methods, bolstered by participant observation and ethnographic observations. Beaman explores indexicalities of identity, accommodation, and geographic mobility to investigate how predictable sociolinguistic patterns promote variation and influence language change. Empirically, this volume documents processes of dialect leveling and supraregionalization and the emergence of a Swabian Renaissance among younger, well-educated urban speakers who leverage the social indexical status of certain linguistic variables to convey social meanings of local prestige and community belonging. Methodologically, this book offers best practices from a combined panel and trend study, demonstrating the compatibility and complementarity of real and apparent time analyses in uncovering the nature, rate, and dispersion of linguistic change. Theoretically, this work links intraspeaker lifespan change and interspeaker community change into a holistic approach, pushing forward our understanding of the role that orderly heterogeneity plays in language variation and change. This book will be of interest to students and scholars in sociolinguistics, linguistic anthropology, dialectology, and historical linguistics.

*Of Banks And Crises* Cristina Peicuti, Jacques Beysade, 2024-04-29. It is a familiar remark that only the rich can borrow and the experience of every day seems to prove it. Yet the poor also may have need of credit even more than the rich. How then can they obtain it? This problem is easily solved by cooperation. An isolated laborer or artisan, no matter how honest or industrious he may be, cannot furnish sufficient guarantee for a loan. Sickness, loss of work, and death may at any time overtake him and make it impossible, despite his best intentions, to pay back what he has borrowed. But if laborers or artisans, to the number of ten, a hundred, or a thousand, are grouped in an organization and held together, if need be by the ties of collective responsibility, the security they have to offer will be considerably greater and they will find it much easier to obtain credit without falling into the hands of usurers. The dues which are paid to such an organization, moreover, will ultimately build up to a large amount of capital which the organization can lend to its members. Charles
