EXAM

1. A solid, non-conducting, sphere of radius R is charged with a uniform charge density $\rho > 0$. If a particle of charge $q < 0$ and mass m is released from a distance $2R$ from the centre of the sphere:
 - (a) at what speed the charge q will arrive at the surface of the sphere?
 - (b) if a very small hole is made through the sphere, without disturbing the charge distribution symmetry, see the figure 1, at what speed the charge q will arrive to the centre of the sphere?
 - (c) if the charge q is now released from the surface of the sphere, how long it will take to return to the same position?
2. An infinitely long straight wire carrying a current I lies in the same plane of a rectangular loop of width a and height b , see figure 2. The loop was made with a conductor of circular cross section of diameter d and resistivity ρ . If the loop was initially at a distance ℓ_0 from the wire, $\ell(t=0) = \ell_0$, and moves at a constant speed v , calculate:
 - (a) the current intensity and direction (clockwise or counterclockwise) and the dissipation on the loop when $d = v\ell$ (justify your answers).

The administration of examinations for 15-19 year olds in England Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15 19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii

Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate **Multilingual**
