Progress Toward Implementation of the 2013 Decadal Survey for Solar and Space Physics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Review of Progress Toward Implementing the Decadal Survey – "Solar and Space Physics: A Science for a Technological Society, 2020-07-29 The 2013 report Solar and Space Physics A Science for a Technological Society outlined a program of basic and applied research for the period 2013–2022. This publication describes the most significant scientific discoveries, technical advances, and relevant programmatic changes in solar and space physics since the publication of that decadal survey. Progress Toward Implementation of the 2013 Decadal Survey for Solar and Space Physics assesses the degree to which the programs of the National Science Foundation and the National Aeronautics and Space Administration address the strategies, goals, and priorities outlined in the 2013 decadal survey and the progress that has been made in meeting those goals. This report additionally considers steps to enhance career opportunities in solar and space physics and recommends actions that should be undertaken to prepare for the next decadal survey.

**Knowledge-building** Karl Maton, Susan Hood, Suellen Shay, 2015-10-08 Education and knowledge have never been more important to society yet research is segmented by approach, methodology, or topic. Legitimation Code Theory (LCT) extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by enabling dialogue between theory and data in qualitative research, bringing together quantitative and qualitative methodologies in mixed methods research, relating theory and practice in praxis, conducting interdisciplinary studies with systemic functional linguistics. Part II offers a series of studies of pressing issues facing knowledge building in education and beyond, encompassing diverse subject areas including physics, English, cultural studies, music, and design, educational sites, schooling, vocational education, and higher education, practices of research, curriculum, pedagogy, and assessment, both education and informal learning contexts such as museums and Masonic lodges. Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology, and linguistics.
